NYSDOH Adult Sepsis and COVID-19 Data Dictionary

Digitalized Data Collection, D2.1.1

Version (Digital) D2.1.1

<mark>May 13,</mark> 2021

This dictionary includes the administrative codes found in the Appendices in a CSV format available for download to assist in data extraction.

The most recent version of this document, the Frequently Asked Questions document, the Table of *Elements* data template, and the instructions may be found at: https://ny.sepsis.ipro.org

Questions regarding this document should be submitted at: https://ny.sepsis.ipro.org/support

Changes from version D2.1 to D2.1.1 are highlighted in green.

Changes from version D2.0 to D2.1 are highlighted in yellow.

Prepared by: Office of Quality and Patient Safety New York State Department of Health Released for use 2020 Revised May 13, 2021

Key points to remember during data extraction

The New York State Department of Health (NYDOH) is seeking the collection of data for all severe sepsis, septic shock, and severe COVID-19 inpatients, ED patients and Observation patients who meet the case inclusion definition provided on the following page of this dictionary.

Data for all patients who are 21 years of age or older are to be reported into the adult NYSDOH database. Patient age at admission should be used to determine reporting to the adult or the pediatric database.

When using the appendices for the identification of relevant ICD-10-CM codes, be sure to capture any code (ICD-10-CM) in any position at any point during hospitalization unless otherwise indicated in the variable directions.

Most variables are required but there are some exceptions such as *Transfer Facility Identifier Receiving* and *Transfer Facility Identifier Sending* which are situational. For transfer data elements we recognize that your hospital EHR may not have Transfer Facility Identifier Receiving/Sending but may have Transfer Facility Name Receiving/Sending. Please report all data you have regarding transfers. Within hospital (interdepartmental transfers) are not considered transfers for these data elements.

Hospitals that have within hospital transfers patients (i.e. patient transferred from one unit to another within the same hospital) should report the case as it is collected in the EHR. For example, if your EHR represents a patient transferred from a rehab unit to an acute care unit as one single admission in your EHR, please report this admission as one record. If this is reported as two separate admissions, please submit it as two separate records. Be sure to use the appropriate discharge disposition to accurately represent the case.

This data dictionary has been designed to eliminate the need for manual chart abstraction and to permit hospitals to utilize their information technology staff and electronic medical record systems to extract the necessary data. This data will be accepted in to the current portal in a flat file format following existing procedures which may be found at https://ny.sepsis.ipro.org/.

CSV files of codes in appendices are provided separately. Each CSV file contains three columns: the codes of the variable/data element in appendices, the corresponding code description, and the subcategory if applicable. For example:

| ICD-10-CM CODE | ICD-10-CM CODE DESCRIPTION | Subcategory |
|----------------|---|-------------|
| 12101 | ST elevation (STEMI) myocardial infarction | MI |
| | involving left main coronary artery | |
| 12102 | ST elevation (STEMI) myocardial infarction | MI |
| | involving left anterior descending coronary | |
| | artery | |

Please note that data elements with multiple selections (more than Yes/No) will have values/contents in the subcategory column in the CSV files, for example *Acute Cardiovascular Conditions*. In general, the naming convention for CSV files is TemplateVariable_code_Version. For example:

• asthma_code_VerD2.1.1.csv

In the event that the CSV files are for NDC codes of medications, ndc is added in the naming convention. For example:

medication_anticoagulation_ndc_code_VerD2.1.1.csv

Inclusion Definition

The NYSDOH is identifying the (denominator) population of cases for inclusion into the database using ICD-10-CM codes. Hospitals may use all sources of data for case inclusion (electronic medical record codes as well as administrative and billing codes). This will allow for electronic identification of cases. The ICD-10-CM code-based definition for identifying the severe sepsis/septic shock and severe COVID-19 patient population for abstraction includes the following codes which are presented in Tables A and B. Cases with codes in either table are to be reported.

Hospitals will report cases where criteria are met by:

- At least one code in Table A alone; OR
- At least two codes in Table B, one of which must be either U071 OR U072 OR J1282 as well as one or more of the codes beginning with J80 through T8112XA

Examples:

- Patient with Code T8112XA and no other code from Table A or Table B is reported.
- Patient with U072 and R602 and no other code from Table A or Table B is reported.
- Patient with U071 and no other code from Table A or Table B is <u>not</u> reported.
- Patient with R6520 and no other codes from Table A or Table B is reported. This case is reported because R6520 alone is a reportable case regardless of additional codes reported on the case.

Table A: Severe sepsis and/or septic shock inclusion ICD-10-CM codes

| Severe Sepsis/Septic Shock | | |
|----------------------------|---|--|
| ICD-10-CM | Description | |
| R6520 | Severe sepsis without septic shock | |
| R6521 | Severe sepsis with septic shock | |
| T8112XA | Post procedural septic shock, initial encounter | |

OR

Table B: Severe COVID-19 inclusion ICD-10-CM codes

| Severe COVI | D-19 | |
|------------------------------------|--|-------------|
| ICD-10-CM | Description | Туре |
| U071 | COVID-19, virus identified | COVID-19 |
| U072 | COVID-19, virus not identified (Clinically-epidemiologically diagnosed COVID-19) | COVID-19 |
| J1282 | Pneumonia due to coronavirus disease 2019 (This code is effective as of January 1, 2021). | COVID-19 |
| AND (one or more of the following) | | |
| J80 | Acute respiratory distress | Respiratory |

| Severe COVI | D-19 | |
|-------------|--|----------------------|
| ICD-10-CM | Description | Туре |
| | syndrome | |
| J9600 | Acute respiratory failure, unsp w | Respiratory |
| | hypoxia or hypercapnia | |
| J9601 | Acute respiratory failure with | Respiratory |
| | hypoxia | |
| J9602 | Acute respiratory failure with | Respiratory |
| | hypercapnia | |
| J9690 | Respiratory failure, unsp, unsp w | Respiratory |
| | hypoxia or hypercapnia | |
| J9691 | Respiratory failure, unspecified | Respiratory |
| | with hypoxia | |
| J9692 | Respiratory failure, unspecified | Respiratory |
| | with hypercapnia | Dessively |
| R0600 | Dyspnea, unspecified | Respiratory |
| R0609 | Other forms of dyspnea | Respiratory |
| R092 | Respiratory arrest | Respiratory |
| J1289 | Other viral pneumonia | Respiratory |
| R0902 | Hypoxemia | Respiratory |
| J9620 | Acute and chr resp failure, unsp | Respiratory |
| 10004 | w hypoxia or hypercapnia | Descientes |
| J9621 | Acute and chronic respiratory | Respiratory |
| J9622 | failure with hypoxia | Despiratory |
| J9022 | Acute and chronic respiratory failure with hypercaphia | Respiratory |
| R0603 | Acute respiratory distress | Respiratory |
| R0602 | Shortness of breath | Respiratory |
| N170 | Acute kidney failure with tubular | renal failure |
| 1170 | necrosis | <u>ienal_</u> ianare |
| N171 | Acute kidney failure with acute | renal failure |
| | cortical necrosis | |
| N172 | Acute kidney failure with | renal failure |
| | medullary necrosis | — |
| N178 | Other acute kidney failure | renal_failure |
| N179 | Acute kidney failure, unspecified | renal_failure |
| K7111 | Toxic liver disease with hepatic | hepatic_failure |
| | necrosis, with coma | |
| K7200 | Acute and subacute hepatic | hepatic_failure |
| | failure without coma | |
| K7201 | Acute and subacute hepatic | hepatic_failure |
| | failure with coma | |
| K7290 | Hepatic failure, unspecified | hepatic_failure |

| Severe COVI | D-19 | |
|-------------|---|------------------------|
| ICD-10-CM | Description | Туре |
| | without coma | |
| K7291 | Hepatic failure, unspecified with | hepatic_failure |
| | coma | |
| K762 | Central hemorrhagic necrosis of | hepatic_failure |
| | liver | |
| K763 | Infarction of liver | hepatic_failure |
| D65 | Disseminated intravascular | coagulation |
| | coagulation | |
| D688 | Other specified coagulation | coagulation |
| | defects | |
| D689 | Coagulation defect, unspecified | coagulation |
| D6951 | Posttransfusion purpura | coagulation |
| | | |
| | | |
| D6959 | Other secondary | coagulation |
| DCOC | thrombocytopenia | |
| D696 | Thrombocytopenia, unspecified | coagulation |
| F05 | Delirium due to known | cns_failure |
| G931 | physiological condition | ana failura |
| 6951 | Anoxic brain damage, not elsewhere classified | cns_failure |
| G9340 | Encephalopathy, unspecified | cns failure |
| G9341 | Metabolic encephalopathy | cns failure |
| G9349 | Other encephalopathy | cns_failure |
| R4020 | Unspecified coma | cns failure |
| 1462 | Cardiac arrest due to underlying | cardiovascular failure |
| | cardiac condition | |
| 1468 | Cardiac arrest due to other | cardiovascular_failure |
| | underlying condition | _ |
| I469 | Cardiac arrest, cause unspecified | cardiovascular_failure |
| 1951 | Orthostatic hypotension | cardiovascular_failure |
| 19589 | Other hypotension | cardiovascular_failure |
| 1959 | Hypotension, unspecified | cardiovascular_failure |
| R031 | Nonspecific low blood-pressure | cardiovascular_failure |
| | reading | |
| R570 | Cardiogenic shock | cardiovascular_failure |
| R571 | Hypovolemic shock | cardiovascular_failure |
| R578 | Other shock | cardiovascular_failure |
| R579 | Shock, unspecified | cardiovascular_failure |
| R6520 | Severe sepsis without septic | severe_sepsis |
| | shock | |

| Severe COVID-19 | | |
|-----------------|--|--------------|
| ICD-10-CM | Description | Туре |
| R6521 | Severe sepsis with septic shock | septic_shock |
| T8112XA | Postprocedural septic shock, initial encounter | septic_shock |

Demographic Variables

| Dataset Segment: | Demographic Variables | |
|--------------------|-----------------------|--|
| Data Element Name: | Admission Datetime | |
| Template Variable: | admission_dt | |
| Format – Length: | Datetime – 16 | |
| Mandatory: | Yes | |

Indicates the date and time that the patient was admitted to inpatient status at the hospital.

Codes and Values:

Enter the Admission Datetime.

- <u>Formatting:</u>
 - 1. Format must be YYYY-MM-DD hh:mm
 - a. YYYY-MM-DDThh:mm is also valid
 - YYYY = four-digit year
 MM = two-digit month (01 = January, etc.)
 DD = two-digit day of month (01 through 31)
 hh = two digits of hour (00 through 23) (am/pm is NOT allowed)
 mm = two digits of minute (00 through 59)
 - 3. Example: 11:42 pm November 3, 1959 = 1959-11-03 23:42
 a. 1959-11-03T23:42 is also valid
 - 4. Midnight = 00:00, **NOT** 24:00
- Cannot have been after *Discharge Datetime*.
- Observation only cases and ED only cases that do not progress to an inpatient admission may use the *Arrival Datetime* as admission date and time.
- If there is a difference between arrival to inpatient floor and the written admission order, report the time the admission order was written.

| Dataset Segment: | Demographic Variables | |
|--------------------|-----------------------|--|
| Data Element Name: | Arrival Datetime | |
| Template Variable: | arrival_dt | |
| Format – Length: | Datetime – 16 | |
| Mandatory: | Yes | |

Indicates the earliest documented date and time the patient arrived at the hospital.

Codes and Values:

Enter the Arrival Datetime.

- <u>Formatting:</u>
 - 1. Format must be YYYY-MM-DD hh:mm
 - a. YYYY-MM-DDThh:mm is also valid
 - YYYY = four-digit year
 MM = two-digit month (01 = January, etc.)
 DD = two-digit day of month (01 through 31)
 hh = two digits of hour (00 through 23) (am/pm is NOT allowed)
 mm = two digits of minute (00 through 59)
 - 3. Example: 11:42 pm November 3, 1959 = 1959-11-03 23:42
 - a. 1959-11-03T23:42 is also valid
 - 4. Midnight = 00:00, **NOT** 24:00
- Report earliest date and time the patient arrived at the ED, at the nursing floor, for observation, or as a direct admit to the cath lab.
- The arrival date and time may differ from the Admission Datetime.
- Cannot be after the *Discharge Datetime*.
- Observation Status:
 - If the patient was admitted to observation from an outpatient setting of the hospital, use the date and time the patient arrives at the ED or on the floor of observation care as the arrival date and time.
 - If the patient was admitted to observation from the ED of the hospital, use the date and time the patient arrived at the ED as the *Arrival Datetime*.
- <u>Direct Admits:</u>
 - If the patient is a "Direct Admit" to the cath lab, use the earliest date and time the patient arrived at the cath lab (or cath lab staging/holding area) as the *Arrival Datetime*.

- If the patient is a "Direct Admit" to acute inpatient or observation, use the earliest date and time the patient arrived at the nursing floor or in observation as the *Arrival Datetime*.
- If the patient was transferred from your hospital's satellite/free-standing ED or from another hospital within your hospital's system (as an inpatient or ED patient) and there is one medical record for the care provided at both facilities, use the *Arrival Datetime* at the first facility.
- The *Arrival Datetime* can be obtained from the time period that the patient was an ED patient.

Demographic Variables

| Data Element Name: | Date of Birth |
|--------------------|---------------|
| Template Variable: | date_of_birth |
| Format – Length: | Date — 10 |
| Mandatory: | Yes |

Description:

Indicates the date of birth of the patient.

Codes and Values:

Enter the Date of Birth.

- <u>Formatting:</u>
 - 1. Format must be YYYY-MM-DD
 - YYYY = four-digit year
 MM = two-digit month (01 = January, etc.)
 DD = two-digit day of month (01 through 31)
 - 3. Example: November 3, 1959 = 1959-11-03
- Date of Birth cannot be after Admission Datetime.
- Patient age at admission should be used to determine reporting to the adult or the pediatric database. If a patient is observation only or ED only, please use patient age at the time of arrival for determination of the adult or pediatric database inclusion.
- Data for all patients who are 21 years of age or older are to be reported into the adult NYSDOH database.
 - Patients under 21 as of their admission date will be rejected and required for submission to the pediatric sepsis data file.

| Dataset Segment: | Demographic Variables | |
|--------------------|-----------------------|--|
| Data Element Name: | Discharge Datetime | |
| Template Variable: | discharge_dt | |
| Format – Length: | Datetime — 16 | |
| Mandatory: | Yes | |

Indicates the date and time that the patient was discharged from the hospital, left against medical advice, or expired.

Codes and Values:

Enter the Discharge Datetime.

- <u>Formatting:</u>
 - Format must be YYYY-MM-DD hh:mm

 YYYY-MM-DDThh:mm is also valid
 - YYYY = four-digit year
 MM = two-digit month (01 = January, etc.)
 DD = two-digit day of month (01 through 31)
 hh = two digits of hour (00 through 23) (am/pm NOT allowed)
 mm = two digits of minute (00 through 59)
 - 3. Example: 11:42 pm November 3, 1959 = 1959-11-03 23:42
 a. 1959-11-03T23:42 is also valid
 - 4. Midnight = 00:00, **NOT** 24:00
- Cannot precede 2014-04-01 00:00.
- Cannot precede Admission Datetime or Arrival Datetime.
- If the time of death and administrative discharge date and times are not the same, use the time of death for *Discharge Datetime*.
- For a patient who is discharged from one unit/department to another unit/department within the same facility, the **final discharge from the facility** is what should be reported for *Discharge Datetime*. Do not use discharges from internal transfers, since these are not actually separate hospital admissions – the entire period should be submitted as one record.

| Dataset Segment: | Demographic Variables |
|--------------------|-----------------------|
| Data Element Name: | Discharge Status |
| Template Variable: | discharge_status |
| Format – Length: | Enumerated – 2 |
| Mandatory: | <mark>Yes</mark> |

Indicates the code that best represents the patient's destination after discharge from the hospital.

Codes and Values:

- 01 = Discharge to Home or Self Care (Routine Discharge). Includes discharge to home; home on oxygen if DME only; any other DME only; group home, foster care, independent living and other residential care arrangements; outpatient programs, such as partial hospitalization or outpatient chemical dependency programs.
- 02 = Discharged/transferred to a Short-Term General Hospital for Inpatient Care.
- 03 = Discharged/transferred to Skilled Nursing Facility (SNF) with Medicare Certification in anticipation of Skilled Care. Medicare indicates that the patient is discharged/transferred to a Medicare certified nursing facility. For hospitals with an approved swing bed arrangement, use Code 61 Swing Bed. For reporting other discharges/transfers to nursing facilities see 04 and 64.
- 04 = Discharged/transferred to a Facility that Provides Custodial or Supportive Care. This is used to designate patients that are discharged/transferred to a nursing facility with neither Medicare nor Medicaid certification and for discharges/transfers to Assisted Living Facilities.
- 05 = Discharged/transferred to a Designated Cancer Center or Children's Hospital.
- 06 = Discharged/transferred to Home under Care of Organized Home Health Service Organization in Anticipation of Covered Skilled Care. Report this code when the patient is discharged/transferred to home with a written plan of care (tailored to the patient's medical needs) for home care services. Not used for home health services provided by a DME supplier or from a Home IV provider for home IV services.
- 07 = Left against medical advice or discontinued care.
- 09 = Admitted as an Inpatient to this Hospital. Patient admitted to the same short-term medical or specialty hospital where the hospital-based ambulatory surgery service was performed (excluding chronic disease hospitals).
- 20 = Expired.
- 21 = Discharged/transferred to Court/Law Enforcement.
- 50 = Hospice Home.
- 51 = Hospice Medical Facility (Certified) Providing Hospice Level of Care.
- 61 = Discharged/transferred to Hospital-Based Medicare Approved Swing Bed.
- 62 = Discharged/transferred to an Inpatient Rehabilitation Facility (IRF), including Rehabilitation Distinct Part Unit of a hospital.

- 63 = Discharged/transferred to a Medicare Certified Long Term Care Hospital (LTCH).
- 64 = Discharged/transferred to a Nursing Facility Certified under Medicaid but not certified under Medicare.
- 65 = Discharged/transferred to a Psychiatric Hospital or Psychiatric Distinct Part Unit of a Hospital.
- 66 = Discharged/transferred to a Critical Access Hospital (CAH).
- 69 = Discharged/transferred to a Designated Disaster Alternative Care Site.
- 70 = Discharged/transferred to another Type of Health Care Institution not defined Elsewhere in this Code List.
- 81 = Discharged to Home or Self Care with a Planned Acute Care Hospital Inpatient Readmission.
- 82 = Discharged/transferred to a Short-Term General Hospital for Inpatient Care with a Planned Acute Care Hospital Inpatient Readmission.
- 83 = Discharged/transferred to Skilled Nursing Facility (SNF) with Medicare Certification with a Planned Acute Care Hospital Inpatient Readmission.
- 84 = Discharged/transferred to a Facility that Provides Custodial or Supportive Care with a Planned Acute Care Hospital Inpatient Readmission.
- 85 = Discharged/transferred to a Designated Cancer Center or Children's Hospital with a Planned Acute Care Hospital Inpatient Readmission.
- 86 = Discharged/transferred to Home under Care of Organized Home Health Service Organization with a Planned Acute Care Hospital Inpatient Readmission.
- 87 = Discharged/transferred to Court/Law Enforcement with a Planned Acute Care Hospital Inpatient Readmission.
- 88 = Discharged/transferred to a Federal Health Care Facility with a Planned Acute Care Hospital Inpatient Readmission.
- 89 = Discharged/transferred to Hospital-Based Medicare Approved Swing Bed with a Planned Acute Care Hospital Inpatient Readmission.
- 90 = Discharged/transferred to an Inpatient Rehabilitation Facility (IRF) including Rehabilitation Distinct Part Units of a Hospital with a Planned Acute Care Hospital Inpatient Readmission.
- 91 = Discharged/transferred to a Medicare Certified Long Term Care Hospital (LTCH) with a Planned Acute Care Hospital Inpatient Readmission.
- 92 = Discharged/transferred to a Nursing Facility Certified under Medicaid but not Certified under Medicare with a Planned Acute Care Hospital Inpatient Readmission.
- 93 = Discharged/transferred to a Psychiatric Hospital or Psychiatric Distinct Part Unit of a Hospital with a Planned Acute Care Hospital Inpatient Readmission.
- 94 = Discharged/transferred to a Critical Access Hospital (CAH) with a Planned Acute Care Hospital Inpatient Readmission.
- 95 = Discharged/transferred to another Type of Health Care Institution not Defined Elsewhere in this Code List with a Planned Acute Care Hospital Inpatient Readmission.

| Dataset Segment: | Demographic Variables | |
|--------------------|------------------------------------|--|
| Data Element Name: | Ethnicity | |
| Template Variable: | ethnicity | |
| Format – Length: | <mark>Set – maximum 5 codes</mark> | |
| Mandatory: | Yes | |

Indicates the code that best describes the ethnicity of the patient from the electronic health record (EHR).

Codes and Values:

Examples: E1 = SPANISH/HISPANIC ORIGIN E1.04.004 = Colombian E2 = NOT HISPANIC OR LATINO E9 = UNKNOWN

- If reporting multiple ethnicity codes (up to 5 codes), separate each code using a colon (e.g. "E1.02: E1.04" is Mexican and South American).
- Multiple ethnicity codes within the same heading are expected as there might be many different origins within a heading (e.g. "E1.02.001 Mexican American" and "E1.02.002 Mexicano" are within the same heading "E1.02 Mexican"). However we would not expect a selection of codes within any two headings of "E1 SPANISH/HISPANIC ORIGIN", "E2 NOT HISPANIC OR LATINO", and "E9 UNKNOWN".
- To obtain the full list of codes, please refer to the following link to the SPARCS code set:
- SPARCS(RR-Race and Ethnicity Codes, Source: Race and Ethnicity Code Set -Version 1.0): https://www.health.ny.gov/statistics/sparcs/sysdoc/apprr.htm

Demographic Variables

Data Element Name: Template Variable: Format – Length: <mark>Mandatory:</mark> Facility Identifier facility_identifier Varchar – 6 Yes

Description:

This number is the facility's four to six-digit Permanent Facility Identifier (PFI) assigned by the Department of Health.

Department regulations state that services must be reported under the physical location where they are provided. Common ownership of different facilities does not change this requirement.

Codes and Values:

Enter the Facility Identifier.

- Must be a valid number as maintained by the NYSDOH.
- Can only contain numbers 0-9.

Data Element Name:GenderTemplate Variable:genderFormat – Length:Enumerated – 1Mandatory:Yes

Description:

Indicates the gender of the patient.

Codes and Values:

M = Male

F = Female

U = Unknown

Notes for Abstraction:

Demographic Variables

| Dataset Segment: | Demographic Variables |
|--------------------|-----------------------|
| Data Element Name: | ICD-10-CM Code (n) |
| Template Variable: | icd_10_cm_code_(n) |
| Format – Length: | Set — 8 |
| Mandatory: | Yes |

All diagnosis codes (primary and secondary) from the final hospital billed codes. There can be up to 25 codes, and each code will have its own variable and POA indicator. The first ICD-10-CM (Code 1) will be the **principal** diagnosis.

Codes and Values:

Enter the ICD-10-CM Codes.

- These should be reported as 25 individual variables. The variable fields for these will be as follows:
 - The first Data Element will be ICD-10-CM Code 1 with a template variable of icd_10_cm_code1. ICD-10-CM Code 1 is the PRINCIPAL Diagnosis. All other codes will be secondary diagnosis codes;
 - The twentieth Data Element will be ICD-10-CM Code 20 with a template variable of icd_10_cm_code_20.
- Please provide the final hospital billed codes in this field.
- Hospitals may report up to 25 codes and their indicators, including the principal and secondary codes.
- The ICD-10-CM codes would be submitted WITH the appropriate decimal place (AFTER the 3rd character) for each ICD-10-CM code.

| Dataset Segment: | Demographic Variables |
|--------------------|-----------------------------|
| Data Element Name: | ICD-10-CM POA Indicator (n) |
| Template Variable: | icd_10_cm_poa_indicator_(n) |
| Format – Length: | Enumerated — 1 |
| Mandatory: | Yes |

Present on Admission (POA) indicator for each ICD-10-CM diagnosis code, aligning with the data element *ICD-10-CM Code (n)*. The first ICD-10-CM POA (Indicator 1) will be the **principal** diagnosis POA indicator.

Codes and Values:

- Y = Present on admission
- N = Not present on admission
- U = No information in the record
- W = Clinically undetermined
- E = Exempt from POA reporting

- These should be reported as 25 individual variables. The variable fields for these will be as follows:
 - The first Data Element will be ICD-10-CM_POA Indicator 1 with a template variable of icd_10_cm_poa_indicator_1. ICD-10-CM POA Code 1 is the PRINCIPAL Diagnosis POA indicator. All other codes will be secondary diagnosis POA indicators.
 - The twentieth Data Element will be ICD-10-CM POA Indicator 20 with a template variable of icd_10_cm_ poa_indicator_20.
- Please provide the final hospital billed codes in this field.
- Hospitals may report up to 25 POA indicators.
- Please provide the final hospital billed code's POA indicator in this field. Please ensure it aligns with *ICD-10-CM Code (n)*.
- Hospitals are required to report a POA indicator for each ICD-10-CM Code reported.
 - For example, if there are five (5) ICD-10_CM codes reported then five (5) ICD-10-CM POA indicators will be required in the data submission.

Demographic Variables

| Data Element Name: | Insurance Number |
|--------------------|------------------|
| Template Variable: | insurance_number |
| Format – Length: | Varchar – 19 |
| Mandatory: | <mark>Yes</mark> |

Description:

Indicates the primary insurance policy identification number for the patient.

Codes and Values:

Enter the Insurance Number.

Notes for Abstraction:

- Allows blanks only if Element Payer is not:
 - Medicare ("C")
 - Medicaid ("D")
 - Insurance Company ("F")
 - Blue Cross ("G")
- Must be alphanumeric (0-9) (a-z, A-Z).
- Special characters are invalid entries.

Facilities are directed to enter the following values:

| Payer | Type of Number |
|------------|---|
| Blue Cross | Enter the information depending on specific Blue Cross Plan needs and contract requirement. |
| CHAMPUS | Enter the information depending on CHAMPUS regulations. |
| Medicaid | Enter Medicaid Client Identification Number (CIN) of the insured or case head |
| | Medicaid number shown on the Medicaid Identification Card. |
| Medicare | Enter the patient's Medicare HIC number as shown on the Health Insurance Card, Certificate of Award, Utilization Notice, Temporary Eligibility Notice, and Hospital Transfer Form or as reported by the Social Security Office. |

For all other payer types (commercial insurers, etc.) enter the insured's unique number assigned by the payer.

| Dataset Segment: | Demographic Variables |
|--------------------|-----------------------|
| Data Element Name: | Medical Record Number |
| Template Variable: | medical_record_number |
| Format – Length: | Varchar – 17 |
| Mandatory: | Yes |

Indicates the number used by the hospital's Medical Records Department to identify the patient's permanent medical record file. This number is not the same as the Patient Control Number.

Codes and Values:

Enter the Medical Record Number.

- Must not equal zero or blanks.
- Must be alphanumeric (0-9) (a-z, A-Z).
- Special characters are invalid entries.

| Dataset Segment: | Demographic Variables |
|--------------------|---------------------------|
| Data Element Name: | Other Payer |
| Template Variable: | other_payer |
| Format – Length: | <mark>Varchar – 50</mark> |
| Mandatory: | No |

Indicate the other payers for this hospitalization. This aligns with Payer source E and/or I.

Codes and Values:

Enter Other Payer.

- If either E or I is reported under *Payer*, then Other Payer must be completed.
- If multiple other payers are to be reported, each payer will be separated by a colon (:).
- Include a code and a description if a code is captured in your EHR.

| Dataset Segment: | Demographic Variables |
|--------------------|------------------------|
| Data Element Name: | Patient Control Number |
| Template Variable: | patient_control_number |
| Format – Length: | Varchar – 20 |
| Mandatory: | Yes |

Indicates the patient's unique number assigned by the provider to facilitate retrieval of individual financial and clinical records and posting of payment.

Codes and Values:

Enter the Patient Control Number.

- Must not equal zero or blanks.
- Must be alphanumeric (0-9) (a-z, A-Z).
- Special characters are invalid entries.

Demographic Variables

Data Element Name: Template Variable: Format – Length: Mandatory: Patient Zip Code of Residence patient_zip_code_of_residence Varchar – 10 Yes

Description:

Indicates the patient's 9-digit zip code of residence.

Codes and Values:

Enter the Patient Zip Code of Residence.

- Format should be xxxxx-xxxx
- If a hospital does not have the four-digit extension to the zip code, then the five-digit zip code should be reported followed by 0000 in the extension (e.g., 11201-0000).
- Should only consist of numbers 0-9.

| Dataset Segment: | Demographic Variables |
|--------------------|------------------------------------|
| Data Element Name: | Payer |
| Template Variable: | payer |
| Format – Length: | <mark>Set – maximum 3 codes</mark> |
| Mandatory: | Yes |

Indicate the codes that identify the payers for this hospitalization. Provide the primary payer first.

Codes and Values:

- A = Self-Pay
- B = Workers' Compensation
- C = Medicare
- D = Medicaid
- E = Other Federal Program
- F = Insurance Company
- G = Blue Cross
- H = CHAMPUS
- I = Other Non-Federal Program
- J = Disability
- K = Title V
- L = Other/Unknown

- Report up to 3 payers.
- If either E or I is reported, then Other Payer must be completed.
- Each payer will be separated by a colon (:).
- The <u>PRIMARY</u> payer must be listed first.
 - o Example:
 - Workers' Compensation as primary payer and Disability: B:J
 - Blue Cross as primary payer, Insurance Company, Other Federal Program: G:F:E

| Dataset Segment: | Demographic Variables |
|--------------------|-------------------------------------|
| Data Element Name: | Race |
| Template Variable: | race |
| Format – Length: | <mark>Set – maximum 56 codes</mark> |
| Mandatory: | Yes |

Indicates the code that best describes the race of the patient based on the electronic health record.

Codes and Values:

Examples: R2 = Asian R2.01 = Asian Indian R5 = White

- If reporting multiple race codes, separate each code using a colon (e.g. "R2.12: R2.01" is Korean and Asian Indian).
- To obtain the full list of codes, please refer to the following link to the SPARCS code set:
- SPARCS(RR-Race and Ethnicity Codes, Source: Race and Ethnicity Code Set -Version 1.0): https://www.health.ny.gov/statistics/sparcs/sysdoc/apprr.htm

Demographic Variables

Data Element Name: Template Variable: Format – Length: <mark>Mandatory:</mark> Source of Admission source_of_admission Enumerated – 1 Yes

Description:

Indicates the code that best describes the patient's origin before coming to the hospital.

Codes and Values:

- 1 = <u>Non-Health Facility Point of Origin</u>: The patient was admitted to this facility from home or from an assisted living facility.
- 2 = <u>Clinic</u>: The patient was referred to this facility as a transfer from a freestanding or nonfreestanding clinic.
- 4 = <u>Transfer from a Hospital (Different Facility</u>): The patient was admitted to this facility as a hospital transfer from an acute care facility where he or she was an inpatient or outpatient.
- 5 = <u>Transfer from a Skilled Nursing Facility (SNF) or Intermediate Care Facility (ICF)</u>: The patient was admitted to this facility as a transfer from a SNF or ICF where he/she was a resident.
- 6 = <u>Transfer from Another Health Care Facility</u>: The patient was admitted to this facility as a transfer from another type of health care facility that is not defined elsewhere in this code list.
- 8 = <u>Court/Law Enforcement</u>: The patient was admitted to this facility upon the direction of a court of law or upon the request of a law enforcement agency representative.
- 9 = <u>Information Not Available</u>: The means by which the patient was admitted to this hospital was not known.
- E = <u>Transfer from Ambulatory Surgery Center</u>: The patient was admitted to this facility as a transfer from an ambulatory surgery center.
- F = <u>Transfer from Hospice and is Under a Hospice Plan of Care or Enrolled in a Hospice</u> <u>Program</u>: The patient was admitted to this facility as a transfer from a hospice.

- If a patient is moved from one area of the hospital to another (e.g., from the Emergency Department to the ICU), the patient is not considered a transfer. The patient is considered a transfer when the patient is moved between different hospitals with discharge and admission at each location and separate billing from each location.
- Assisted Living is reported as 1, Non-Health Facility Point of Origin.

| Dataset Segment: | Demographic Variables |
|--------------------|-----------------------|
| Data Element Name: | Transferred In |
| Template Variable: | transferred_in |
| Format – Length: | Enumerated – 1 |
| Mandatory: | Yes |

Indicates if the patient was received as a transfer from another acute care hospital.

Codes and Values:

<mark>0 = No</mark> 1 = Yes

- Report "1", if a patient was transferred in (i.e., received from another acute care hospital).
- Report "0", if a patient was not transferred in.

| Dataset Segment: | Demographic Variables |
|--------------------|-----------------------|
| Data Element Name: | Transferred Out |
| Template Variable: | transferred_out |
| Format – Length: | Enumerated – 1 |
| Mandatory: | Yes |

Indicates if the patient was transferred out to another acute care hospital.

Codes and Values:

<mark>0 = No</mark> 1 = Yes

- Report "1", if a patient was transferred out (i.e., transferred/discharged to another acute care hospital).
- Report "0", if a patient was not transferred out.

Demographic Variables

Data Element Name: Template Variable: Format – Length: Mandatory: Transfer Facility Identifier Receiving transfer_facility_id_receiving Varchar – 6 No

Description:

If your hospital received a transfer patient from an acute care hospital, report the hospital PFI from which you received that patient. This is the transferring facility's four to six-digit Permanent Facility Identifier (PFI) assigned by the Department of Health.

Department regulations state that services must be reported under the physical location where they are provided. Common ownership of different facilities does not change this requirement.

Codes and Values:

Enter the Transfer Facility Identifier Receiving.

Notes for Abstraction:

- Must be a valid number as maintained by the NYSDOH.
- Must only contain numbers 0-9.
- When receiving a patient from an out-of-state facility, please submit the two-digit state identifier https://www2.census.gov/geo/docs/reference/state.txt to represent the transfer facility state. This is **ONLY** to be used when patients are received from an out of state hospital, therefore the code for New York will not be accepted for data submission. For example, a patient received from a Connecticut hospital is submitted with the *transfer_facility_id_receiving* of 09.

To find a hospital PFI, please visit:

https://www.health.ny.gov/statistics/sparcs/reports/compliance/pfi facilities.htm

Demographic Variables

Data Element Name: Template Variable: Format – Length: Mandatory: Transfer Facility Identifier Sending transfer_facility_id_sending Varchar – 6 No

Description:

If your hospital is transferring a patient to another acute care hospital, report the hospital's PFI to which you are sending the patient. This number is the transfer sending facility's four to six-digit Permanent Facility Identifier (PFI) assigned by the Department of Health.

Department regulations state that services must be reported under the physical location where they are provided. Common ownership of different facilities does not change this requirement.

Codes and Values:

Enter the Transfer Facility Identifier Sending.

Notes for Abstraction:

- Must be a valid number as maintained by the NYSDOH.
- Must only contain numbers 0-9.
- When transferring a patient to an out-of-state facility, please submit the two-digit state identifier <u>https://www2.census.gov/geo/docs/reference/state.txt</u> to represent the transfer facility state. This is ONLY to be used when patients are transferred out of state therefore the code for New York will not be accepted for data submission. For example, a patient transferred to a Connecticut hospital is submitted with the *transfer_facility_id_sending* of 09.

To find a hospital PFI, please visit:

https://www.health.ny.gov/statistics/sparcs/reports/compliance/pfi facilities.htm

Data Element Name: Template Variable: Format – Length: Mandatory:

Demographic Variables

Transfer Facility Name Receiving transfer_facility_nm_receiving Varchar – 50 No

Description:

<u>If your hospital received a patient as a transfer from another acute care hospital, report the hospital name from which you received that patient.</u>

Department regulations state that services must be reported under the physical location where they are provided. Common ownership of different facilities does not change this requirement.

Codes and Values:

Enter the Transfer Facility Receiving.

Notes for Abstraction:

• Report when Transfer Facility Identifier Receiving is not available.

Data Element Name: Template Variable: Format – Length: Mandatory:

Demographic Variables

Transfer Facility Name Sending transfer_facility_nm_sending Varchar – 50 No

Description:

<u>If your hospital is transferring a patient to an acute care hospital, report the hospital's name to</u> which you are sending the patient.

Department regulations state that services must be reported under the physical location where they are provided. Common ownership of different facilities does not change this requirement.

Codes and Values:

Enter the Transfer Facility Name Sending.

Notes for Abstraction:

Report when Transfer Facility Identifier Sending is not available.

Demographic Variables

Data Element Name:Unique Personal IdentifierTemplate Variable:unique_personal_identifierFormat – Length:Varchar – 10Mandatory:Yes

Description:

A composite field comprised of portions of the patient last name, first name, and social security number.

Codes and Values:

Included below are the individual components of this data element.

- 1. **"First 2" and "Last 2" characters of the Patient's Last Name**. The birth name of the patient is preferable if it is available on the facility's information system.
- 2. "First 2" characters of the Patient's First Name.
- 3. "Last 4" digits of the Patient's Social Security Number.

NOTE: This data element is not to be confused with *Patient Control Number*, which provides linkage of all record types containing patient-related data for a specific discharge.

Notes for Abstraction:

First and Last Name Components: Must be <u>UPPERCASE</u> alpha characters (A-Z). If the last name is less than 4 characters, the first two and last two characters are used even if some characters are repeated.

Included below are examples of how to report some unusual scenarios: A three-character last name, a two-character last name, a name with junior, a one character first name, a last name with an apostrophe, and a hyphenated last name.

- Joe Tan would be reported as TAANJO
- Bill Su Jr. would be reported as SUSUBI
- E John Smith would be reported as SMTHEE
- Bob O'Brien would be reported as OBENBO
- Sue Jones-Davis would be reported as JOISSU

Social Security Number Component: Must be numeric. If no Social Security Number is available, this sub-field must be zeroes (e.g. TAANJO0000).

Joe Tan with Social Security Number 123-456-7890 would be reported as TAANJO7890

Comorbidity/Risk Factor (POA) Variables

| Dataset Segment: | Comorbidity/Risk Factor (POA) Variables |
|--------------------|---|
| Data Element Name: | Acute Cardiovascular Conditions |
| Template Variable: | acute_cardiovascular_conditions |
| Format – Length: | Enumerated – 1 |
| Mandatory: | Yes |

Indicates that the patient had an <u>acute</u> cardiovascular event present at admission/arrival. This may or may not be evident as a yes on the present on admission indicator as an ICD-10-CM code at or on arrival. Since the intent is to capture all codes not just final billed ICD-10-CMs, a POA indicator may not be available for all cases.

Codes and Values:

- 1 = Myocardial Infarction
- 2 = Ischemic Stroke/Hemorrhagic Stroke/Transient Ischemic Attack (TIA)
- 3 = Myocarditis secondary to COVID-19
- 0 = No Acute Cardiovascular Condition

- Report all that apply.
- Each value will be separated by a colon (:).
- For example:
 - o To report multiple elements: 1:2
- Please see Appendix 1A for a list of applicable ICD-10-CM codes.
- Report "0", if the patient does not have one of the ICD-10-CM codes listed in the referenced appendix.

Comorbidity/Risk Factor (POA) Variables

Data Element Name: Template Variable: Format – Length: Mandatory:

Description:

Indicates that the patient has AIDS or an HIV infection.

Codes and Values:

0 = No 1 = Yes

- Please see Appendix 1B for a list of applicable ICD-10-CM codes.
- Report "1", if the patient has one or more of the ICD-10-CM codes listed in the referenced appendix.
- Report "0", if the patient does not have one of the ICD-10-CM codes listed in the referenced appendix.

Comorbidity/Risk Factor (POA) Variables

Data Element Name: Template Variable: Format – Length: Mandatory: Altered Mental Status altered_mental_status Enumerated – 1 <mark>Yes</mark>

Description:

Indicates that the patient has an altered mental status.

Codes and Values:

0 = No 1 = Yes

- Please see Appendix 1C for a list of applicable ICD-10-CM codes.
- Report "1", if the patient has one or more of the ICD-10-CM codes listed in the referenced appendix.
- Report "0", if the patient does not have one of the ICD-10-CM codes listed in the referenced appendix.

| Dataset Segment: | Comorbidity/Risk Factor (POA) Variables |
|--------------------|--|
| Data Element Name: | Asthma |
| Template Variable: | asthma |
| Format – Length: | Enumerated – 1 |
| Mandatory: | Yes |

Indicates that the patient has asthma.

Codes and Values:

0 = No 1 = Yes

- Please see Appendix 1D for a list of applicable ICD-10-CM codes.
- Report "1", if the patient has one or more of the ICD-10-CM codes listed in the referenced appendix.
- Report "0", if the patient does not have one of the ICD-10-CM codes listed in the referenced appendix.

Data Element Name: Template Variable: Format – Length: Mandatory:

Description:

Indicates that the patient has chronic liver disease.

Codes and Values:

0 = No 1 = Yes

Notes for Abstraction:

- Please see Appendix 1E for a list of applicable ICD-10-CM codes.
- Report "1", if the patient has one or more of the ICD-10-CM codes listed in the referenced appendix.
- Report "0", if the patient does not have one of the ICD-10-CM codes listed in the referenced appendix.

Comorbidity/Risk Factor (POA) Variables

Chronic Liver Disease chronic_liver_disease Enumerated – 1 <mark>Yes</mark>

Data Element Name: Template Variable: Format – Length: Mandatory:

Description:

Indicates that the patient has chronic renal failure.

Codes and Values:

0 = No 1 = Yes

Notes for Abstraction:

- Please see Appendix 1F for a list of applicable ICD-10-CM codes.
- Report "1", if the patient has one or more of the ICD-10-CM codes listed in the referenced appendix.
- Report "0", if the patient does not have one of the ICD-10-CM codes listed in the referenced appendix.

Comorbidity/Risk Factor (POA) Variables

Chronic Renal Failure chronic_renal_failure Enumerated – 1 <mark>Yes</mark>

Comorbidity/Risk Factor (POA) Variables

Chronic Respiratory Failure chronic_respiratory_failure Enumerated – 1 Yes

Data Element Name: Template Variable: Format – Length: Mandatory:

Description:

Indicates that the patient has chronic respiratory failure.

Codes and Values:

0 = No 1 = Yes

- Please see Appendix 1G for a list of applicable ICD-10-CM codes.
- Report "1", if the patient has one or more of the ICD-10-CM codes listed in the referenced appendix.
- Report "0", if the patient does not have one of the ICD-10-CM codes listed in the referenced appendix.

Comorbidity/Risk Factor (POA) Variables

Data Element Name: Template Variable: Format – Length: Mandatory:

Description:

Indicates that the patient has coagulopathy.

Codes and Values:

0 = No 1 = Yes

Notes for Abstraction:

- Please see Appendix 1H for a list of applicable ICD-10-CM codes.
- Report "1", if the patient has one or more of the ICD-10-CM codes listed in the referenced appendix.
- Report "0", if the patient does not have one of the ICD-10-CM codes listed in the referenced appendix.

Coagulopathy coagulopathy Enumerated – 1 <mark>Yes</mark>

Comorbidity/Risk Factor (POA) Variables

Data Element Name: Template Variable: Format – Length: Mandatory:

Description:

Indicates that the patient has congestive heart failure.

Codes and Values:

0 = No 1 = Yes

- Please see Appendix 1I for a list of applicable ICD-10-CM codes.
- Report "1", if the patient has one or more of the ICD-10-CM codes listed in the referenced appendix.
- Report "0", if the patient does not have one of the ICD-10-CM codes listed in the referenced appendix.

| Dataset Segment: | Comorbidity/Risk Factor (POA) Variables |
|--------------------|--|
| Data Element Name: | COPD |
| Template Variable: | copd |
| Format – Length: | Enumerated – 1 |
| Mandatory: | Yes |

Indicates that the patient has chronic obstructive pulmonary disease (COPD).

Codes and Values:

0 = No 1 = Yes

- Please see Appendix 1J for a list of applicable ICD-10-CM codes.
- Report "1", if the patient has one or more of the ICD-10-CM codes listed in the referenced appendix.
- Report "0", if the patient does not have one of the ICD-10-CM codes listed in the referenced appendix.

| Dataset Segment: | Comorbidity/Risk Factor (POA) Variables |
|--------------------|--|
| Data Element Name: | Dementia |
| Template Variable: | dementia |
| Format – Length: | Enumerated – 1 |
| Mandatory: | Yes |

Indicates that the patient has dementia.

Codes and Values:

0 = No 1 = Yes

- Please see Appendix 1K for a list of applicable ICD-10-CM codes.
- Report "1", if the patient has one or more of the ICD-10-CM codes listed in the referenced appendix.
- Report "0", if the patient does not have one of the ICD-10-CM codes listed in the referenced appendix.

| Dataset Segment: | Comorbidity/Risk Factor (POA) Variables |
|--------------------|--|
| Data Element Name: | Diabetes |
| Template Variable: | diabetes |
| Format – Length: | Enumerated – 1 |
| Mandatory: | Yes |

Indicates that the patient has diabetes.

Codes and Values:

0 = No 1 = Yes

- Please see Appendix 1L for a list of applicable ICD-10-CM codes.
- Report "1", if the patient has one or more of the ICD-10-CM codes listed in the referenced appendix.
- Report "0", if the patient does not have one of the ICD-10-CM codes listed in the referenced appendix.

| Dataset Segment: | Comorbidity/Risk Factor (POA) Variables |
|--------------------|--|
| Data Element Name: | Dialysis Comorbidity |
| Template Variable: | dialysis_comorbidity |
| Format – Length: | Enumerated – 1 |
| Mandatory: | Yes |

Indicates that the patient arrived at the hospital already receiving dialysis. This may or may not be evident as a yes on the present on admission indicator as an ICD-10-CM code at or on arrival. Since the intent is to capture all codes not just final billed ICD-10-CMs, a POA indicator may not be available for all cases.

Codes and Values:

- 0 = No
- 1 = Yes

- Please see Appendix 1M for a list of applicable ICD-10-CM codes.
- Report "1", if the patient has one or more of the ICD-10-CM codes listed in the referenced appendix.
- Report "0", if the patient does not have one of the ICD-10-CM codes listed in the referenced appendix.

Comorbidity/Risk Factor (POA) Variables

Data Element Name: Template Variable: Format – Length: <mark>Mandatory:</mark> History of COVID -19 history_of_covid Enumerated – 1 Yes

Description:

Indicates that the patient has a history of a positive COVID-19 test.

Codes and Values:

0 = No 1 = Yes

- Report "1" when the patient has a history of a positive COVID-19 test prior to arrival at the hospital. There is not a time limit on reporting the test as positive. If there is a positive test, even if later followed by a negative test, then report the positive test date.
- SARS-Cov-2 LOINC codes can be downloaded to a csv. This file can be found here: https://loinc.org/sars-cov-2-and-covid-19/
- These codes are not static and are updated regularly; therefore, hospitals should take care to use the most current list of codes to capture COVID-19 testing.

Comorbidity/Risk Factor (POA) Variables

Data Element Name: Template Variable: Format – Length: <mark>Mandatory:</mark> History of COVID-19 Datetime history_of_covid_dt Datetime – 16 No

Description:

Indicates the date and time of the positive *History of COVID-19* test.

Codes and Values:

Enter the History of COVID-19 Datetime.

- If there is more than one positive COVID-19 test, report the earliest positive test.
- Formatting:
 - Format must be YYYY-MM-DD hh:mm

 YYYY-MM-DDThh:mm is also valid
 - YYYY = four-digit year
 MM = two-digit month (01 = January, etc.)
 DD = two-digit day of month (01 through 31)
 hh = two digits of hour (00 through 23) (am/pm NOT allowed)
 mm = two digits of minute (00 through 59)
 - 3. Example: 11:42 pm November 3, 1959 = 1959-11-03 23:42
 - a. 1959-11-03T23:42 is also valid
 - 4. Midnight = 00:00, **NOT** 24:00

Comorbidity/Risk Factor (POA) Variables

Data Element Name: Template Variable: Format – Length: <mark>Mandatory:</mark> History of Other Cardiovascular Disease history_of_other_cvd <mark>Set – maximum 4 codes</mark> Yes

Description:

Indicates the patient's history of other cardiovascular disease.

Codes and Values:

- 1 = Coronary heart disease (e.g. angina pectoris, coronary atherosclerosis)
- 2 = Peripheral artery disease
- 3 = Valve disorder
- 4 = Cerebrovascular disease
- 5 = Cardiomyopathy
- 0 = No history of coronary heart disease, peripheral artery disease, valve disorder or cerebrovascular disease

- Report all that apply.
- Each value will be separated by a colon (:).
- For example:
 - To report multiple elements: 1:2:3
- History of (not acute presentation)
- Please see Appendix 1N for a list of applicable ICD-10-CM codes.
- Report "0", if the patient does not have one of the ICD-10-CM codes listed in the referenced appendix.

| Dataset Segment: | Comorbidity/Risk Factor (POA) Variables |
|--------------------|--|
| Data Element Name: | Hypertension |
| Template Variable: | hypertension |
| Format – Length: | Enumerated – 1 |
| Mandatory: | Yes |

Indicates that the patient has hypertension.

Codes and Values:

0 = No

1 = Yes

- Please see Appendix 10 for a list of applicable ICD-10-CM codes.
- Report "1", if the patient has one or more of the ICD-10-CM codes listed in the referenced appendix.
- Report "0", if the patient does not have one of the ICD-10-CM codes listed in the referenced appendix.

Comorbidity/Risk Factor (POA) Variables

Data Element Name: Template Variable: Format – Length: <mark>Mandatory:</mark> Immunocompromising immunocompromising Enumerated – 1 Yes

Description:

Indicates that the patient has an immunocompromising disease/illness.

Codes and Values:

0 = No 1 = Yes

- Please see Appendix 1P for a list of applicable ICD-10-CM codes.
- Report "1", if the patient has one or more of the ICD-10-CM codes listed in the referenced appendix.
- Report "0", if the patient does not have one of the ICD-10-CM codes listed in the referenced appendix.

| Dataset Segment: | Comorbidity/Risk Factor (POA) Variables |
|--------------------|---|
| Data Element Name: | Lymphoma Leukemia Multiple Myeloma |
| Template Variable: | lymphoma_leukemia_multi_myeloma |
| Format – Length: | Enumerated – 1 |
| Mandatory: | Yes |

Indicates that the patient has malignant neoplasm of lymphatic and hematopoietic tissue including those neoplasms which may be in clinical remission.

Codes and Values:

0 = No 1 = Yes

- Please see Appendix 1Q for a list of applicable ICD-10-CM codes.
- Report "1", if the patient has one or more of the ICD-10-CM codes listed in the referenced appendix.
- Report "0", if the patient does not have one of the ICD-10-CM codes listed in the referenced appendix.

Comorbidity/Risk Factor (POA) Variables

Mechanical Ventilation Comorbidity mechanical_vent_comorbidity Enumerated – 1 Yes

Data Element Name: Template Variable: Format – Length: Mandatory:

Description:

Indicates that the patient arrived at the hospital on mechanical ventilation. This may or may not be evident as a yes on the present on admission indicator as an ICD-10-CM code at or on arrival. Since the intent is to capture all codes not just final billed ICD-10-CMs, a POA indicator may not be available for all cases.

Codes and Values:

- Please see Appendix 1R for applicable ICD-10-CM code.
- Report "1", if the patient has the ICD-10-CM code listed in the referenced appendix.
- Report "0", if the patient does not have the ICD-10-CM code listed in the referenced appendix.

Comorbidity/Risk Factor (POA) Variables

Data Element Name: Template Variable: Format – Length: Mandatory: Medication Anticoagulation medication_anticoagulation Enumerated – 1 Yes

Description:

Indicates that the patient takes anticoagulation medications at home/prior to admission.

Codes and Values:

0 = No 1 = Yes

- Please see Appendix 1S for a list of applicable medications and NDC codes.
- Report "1", if the patient has one or more of the medications or NDC codes listed in the referenced appendix.
- Report "0", if the patient does not have one of the medications or NDC codes listed in the referenced appendix.

| Dataset Segment: | Comorbidity/Risk Factor (POA) Variables |
|--------------------|---|
| Data Element Name: | Medication Immune Modifying |
| Template Variable: | medication_immune_modifying |
| Format – Length: | Enumerated – 1 |
| Mandatory: | Yes |

Indicates that the patient is taking disease modifying medications and therapies (drugs and biologics) for collagen diseases, corticosteroids, chemotherapeutic agents through any modality (oral, IV, IM, etc.) known to specifically adversely impact the function of the immune system as the primary therapeutic goal or as an unintended side effect, including steroids (excluding inhaled or topical steroids) and chemotherapy at time of admission.

Codes and Values:

_ ...

- Please see Appendix 1T for a list of applicable medications and NDC codes.
- Report "1", if the patient has one or more of the medications or NDC codes listed in the referenced appendix.
- Report "0", if the patient does not have one of the medications or NDC codes listed in the referenced appendix.

Data Element Name: Template Variable: Format – Length: Mandatory:

Description:

Indicates that the patient has metastatic cancer.

Codes and Values:

0 = No 1 = Yes

1 = Yes

Notes for Abstraction:

- Please see Appendix 1U for a list of applicable ICD-10-CM codes.
- Report "1", if the patient has one or more of the ICD-10-CM codes listed in the referenced appendix.
- Report "0", if the patient does not have one of the ICD-10-CM codes listed in the referenced appendix.

Comorbidity/Risk Factor (POA) Variables

Metastatic Cancer metastatic_cancer Enumerated – 1 Yes

| Dataset Segment: | Comorbidity/Risk Factor (POA) Variables |
|--------------------|--|
| Data Element Name: | Obesity |
| Template Variable: | obesity |
| Format – Length: | Enumerated – 1 |
| Mandatory: | Yes |

Indicates that the patient is obese (measured as a body mass index (BMI) of 30 or higher).

Codes and Values:

0 = No 1 = Yes

- Combination of ICD-10-CM and/or BMI values from the electronic health record (EHR). Please use the first value upon admission/arrival or the earliest value.
- Please see Appendix 1V for a list of applicable ICD-10-CM codes.
- Report "1", if the patient has one or more of the ICD-10-CM codes listed in the referenced appendix.
- Report "1", if the patient has a BMI value of 30 or higher in the EHR even if they do not have one of the ICD-10-CM codes listed in the referenced appendix.
- Report "0", if the patient does not have one of the ICD-10-CM codes listed in the referenced appendix or a BMI value of 30 or higher in the EHR.

Data Element Name: Template Variable: Format – Length: Mandatory:

Comorbidity/Risk Factor (POA) Variables

Patient Care Considerations patient_care_considerations Set – maximum 3 codes Yes

Description:

Indicates whether the patient has a Do Not Resuscitate (DNR), Do Not Intubate (DNI) or both at any time during the hospital encounter.

Codes and Values:

- Report all that apply.
- Each payer will be separated by a colon (:).
- For example:
 - To report multiple elements: 1:2

Comorbidity/Risk Factor (POA) Variables

Data Element Name: Template Variable: Format – Length: <mark>Mandatory:</mark> Patient Care Considerations Date patient_care_considerations_date Date – 10 No

Description:

Indicate the earliest date associated with *patient_care_considerations*.

Codes and Values:

Enter the Patient Care Considerations Date.

- Format must be YYYY-MM-DD
 - a. YYYY = four-digit year
 - b. MM = two-digit month (01 = January, etc.)
 - c. DD = two-digit day of month (01 through 31)
- Example: November 3, 1959 = 1959-11-03

Comorbidity/Risk Factor (POA) Variables

Data Element Name: Template Variable: Format – Length: Mandatory: Pregnancy Comorbidity pregnancy_comorbidity Enumerated – 1 Yes

Description:

Indicates that the patient has a pregnancy-related comorbidity.

Codes and Values:

0 = No 1 = Yes

- Must be "0" if *Pregnancy Status During Hospitalization* is "0"
- Please see Appendix 1W for a list of applicable ICD-10-CM codes.
- Report "1", if the patient has one or more of the ICD-10-CM codes listed in the referenced appendix.
- Report "0", if the patient does not have one of the ICD-10-CM codes listed in the referenced appendix.

Comorbidity/Risk Factor (POA) Variables

Data Element Name: Template Variable: Format – Length: <mark>Mandatory:</mark> Pregnancy Status During Hospitalization pregnancy_status Enumerated – 1 Yes

Description:

Indicates the patient is pregnant, in childbirth, or postpartum on arrival to the hospital or during hospitalization.

Codes and Values:

0 = No 1 = Yes

- Please see Appendix 1X for a list of applicable ICD-10-CM codes.
- Report "1", if the patient has one or more of the ICD-10-CM codes listed in the referenced appendix.
- Report "1" if detection of human chorionic gonadotropic (hCG) in the urine or blood test (lab value).
- Report "0", if the patient does not have one of the ICD-10-CM codes listed in the referenced appendix or does not have detection of human chorionic gonadotropic (hCG) in the urine or blood test (lab value).

Comorbidity/Risk Factor (POA) Variables

| Data Element Name: |
|--------------------|
| Template Variable: |
| Format – Length: |
| Mandatory: |

Smoking Vaping smoking_vaping Enumerated – 1 Yes

Description:

Indicates that the patient is a current smoker and/or a current vaper.

Codes and Values:

0 = No 1 = Yes

- Please see Appendix 1Y for a list of applicable ICD-10-CM codes.
- Report "1", if the patient has one or more of the ICD-10-CM codes listed in the referenced appendix.
- Report "0", if the patient does not have one of the ICD-10-CM codes listed in the referenced appendix.

| Dataset Segment: | Comorbidity/Risk Factor (POA) |
|--------------------|-------------------------------|
| Data Element Name: | Tracheostomy on Arrival |
| Template Variable: | tracheostomy_on_arrival |
| Format – Length: | Enumerated – 1 |
| Mandatory: | Yes |

Indicates that the patient has a tracheostomy upon admission/arrival to the hospital. This may or may not be evident as a yes on the present on admission indicator as an ICD-10-CM code at or on arrival. Since the intent is to capture all codes not just final billed ICD-10-CMs, a POA indicator may not be available for all cases.

Codes and Values:

0 = No 1 = Yes

- Please see Appendix 1Z for a list of applicable ICD-10-CM codes.
- Report "1", if the patient has one or more of the ICD-10-CM codes listed in the referenced appendix.
- Report "0", if the patient does not have one of the ICD-10-CM codes listed in the referenced appendix.

Clinical Variables

Data Element Name: Template Variable: Format – Length: Mandatory:

Clinical Variables

COVID-19 Exposure covid_exposure Enumerated – 1 Yes

Description:

Indicates the patient has exposure to COVID-19.

Codes and Values:

0 = No Positive COVID-19 exposure

1 = Positive COVID-19 exposure

- Please see Appendix 2A for a list of applicable ICD-10-CM codes.
- Report "1", if the patient has one or more of the ICD-10-CM codes listed in the referenced appendix.
- Report "0", if the patient does not have one of the ICD-10-CM codes listed in the referenced appendix.

Clinical Variables

Data Element Name: Template Variable: Format – Length: <mark>Mandatory:</mark> COVID-19 Virus covid_virus Enumerated – 1 <mark>Yes</mark>

Description:

Indicates COVID-19 virus is identified or not identified.

Codes and Values:

- 0 = COVID-19, virus not identified
- 1 = COVID-19, virus identified

- This applies to both present on admission/arrival (POA) or acquired during hospitalization.
- Please see Appendix 2B for a list of applicable ICD-10-CM codes.
- Report "1", if the patient has one or more of the ICD-10-CM codes listed in the referenced appendix.
- Report "0", if the patient does not have one of the ICD-10-CM codes listed in the referenced appendix.

Clinical Variables

Data Element Name: Template Variable: Format – Length: Mandatory: Drug Resistant Pathogen drug_resistant_pathogen Enumerated – 1 Yes

Description:

Indicates that the patient has resistance to an antimicrobial drug.

Codes and Values:

0 = No 1 = Yes

- Please see Appendix 2C for a list of applicable ICD-10-CM codes.
- Report "1", if the patient has one or more of the ICD-10-CM codes listed in the referenced appendix.
- Report "0", if the patient does not have one of the ICD-10-CM codes listed in the referenced appendix.

| Dataset Segment: | Clinical Variables |
|--------------------|--------------------|
| Data Element Name: | Flu Positive |
| Template Variable: | flu_positive |
| Format – Length: | Enumerated – 1 |
| Mandatory: | <mark>Yes</mark> |

Indicates that the patient has a positive flu test present on admission/arrival or during the hospitalization.

Codes and Values:

0 = No 1 = Yes

- POA and/or during hospitalization
- Please see Appendix 2D for a list of applicable codes.
- Report "1", if the patient has one or more of the codes listed in the referenced appendix.
- Report "1", if the patient has a positive influenza virus test (lab value).
- Report "0", if the patient does not have one of the ICD-10-CM codes listed in the referenced appendix or does not have a positive influenza virus test (lab value).

Data Element Name: Template Variable:

Format – Length: <mark>Mandatory:</mark>

Description:

The suspected source of infection.

Codes and Values:

- 1 = septicemia
- 2 = bacteremia
- 3 = fungal infection
- 4 = peritoneal infection
- 5 = heart infection
- 6 = upper respiratory infection
- 7 = lung infection
- 8 = central nervous system infection
- 9 = gastrointestinal infection
- 10 = genitourinary infection
- 11 =soft tissue infection
- 12 = other infection source
- 13 = unknown

Notes for Abstraction:

- Please see Appendix 2E for a list of applicable ICD-10-CM codes.
- If there is not an identified source of infection as specified in Appendix 2E, then report "unknown".
 - Note that "other infection source" is defined in the ICD-10-CM codes provided in the appendix.
- Report all that apply.
- Each value will be separated by a colon (:).
- For example:
 - To report multiple elements: 2:9:12

Clinical Variables

Suspected Source of Infection suspected_source_of_infection Set – maximum 12 codes Yes **Treatment (during hospitalization) Variables**

Treatment (during hospitalization) Variables

Data Element Name: Template Variable: Format – Length: <mark>Mandatory:</mark> Dialysis Treatment dialysis_treatment Enumerated – 1 <mark>Yes</mark>

Description:

Indicates that the patient has an order for dialysis during the hospitalization.

Codes and Values:

0 = No 1 = Yes

- Combination of ICD-10-PCS or an order from the electronic health record (EHR).
- Please see Appendix 3A for a list of applicable ICD-10-PCS codes.
- Report "1", if the patient has one or more of the ICD-10-PCS codes listed in the referenced appendix.
- Report "1", if the patient has an order for dialysis in the EHR even if they do not have one of the ICD-10-PCS codes listed in the referenced appendix.
- Report "0", if the patient does not have one of the ICD-10-PCS codes listed in the referenced appendix or does not have an order for dialysis in the EHR.

| Dataset Segment: | Treatment (during hospitalization) Variables |
|--------------------|--|
| Data Element Name: | During Hospital Anticoagulation |
| Template Variable: | during_hospital_anticoagulation |
| Format – Length: | Number – 1 |
| Mandatory: | Yes |

Indicates that the patient has an order for anticoagulation medication during the hospitalization.

Codes and Values:

0 = No 1 = Yes

- Please see Appendix 1S for a list of applicable medications and NDC codes.
- Report "1", if the patient has one or more of the medications or NDC codes listed in the referenced appendix.
- Report "0", if the patient does not have one of the medications or NDC codes listed in the referenced appendix.

| Dataset Segment: | Treatment (during hospitalization) Variables |
|--------------------|--|
| Data Element Name: | During Hospital Immune Modifying Medication |
| Template Variable: | during_hospital_immune_mod_med |
| Format – Length: | Number – 1 |
| Mandatory: | Yes |

Indicates that the patient has an order for immune-modifying medication during the hospitalization.

Codes and Values:

0 = No 1 = Yes

- Please see Appendix 1T for a list of applicable medications and NDC codes.
- Report "1", if the patient has one or more of the medications or NDC codes listed in the referenced appendix.
- Report "0", if the patient does not have one of the medications or NDC codes listed in the referenced appendix.

Treatment (during hospitalization) Variables

Data Element Name:During Hospital RemdesivirTemplate Variable:during_hospital_remdesivirFormat – Length:Number – 1Mandatory:Yes

Description:

Indicates the patient has an order for remdesivir during the hospitalization.

Codes and Values:

0 = No 1 = Yes

- Generic: Remdesivir
- Brand name: Veklury and GS-5734
- Please see Appendix 3B for a list of applicable ICD-10-PCS codes.
- Report "1", if the patient has one or more of the ICD-10-PCS codes listed in the referenced appendix.
- Report "1", if the patient has an order for the medication listed in the referenced appendix.
- Report "0", if the patient does not have one of the ICD-10-PCS codes or the medication listed in the referenced appendix.

| Dataset Segment: | Treatment (during hospitalization) Variables |
|--------------------|---|
| Data Element Name: | ECMO |
| Template Variable: | ecmo |
| Format – Length: | Enumerated – 1 |
| Mandatory: | Yes |

Indicates the patient has an order for extracorporeal membrane oxygenation (ECMO) during the hospitalization.

Codes and Values:

0 = No 1 = Yes

- Combination of ICD-10-PCS or an order from the electronic health record (EHR).
- Please see Appendix 3C for a list of applicable ICD-10-PCS codes.
- Report "1", if the patient has one or more of the ICD-10-PCS codes listed in the referenced appendix.
- Report "1", if the patient has an order ECMO in the EHR even if they do not have one of the ICD-10-PCS codes listed in the referenced appendix.
- Report "0", if the patient does not have one of the ICD-10-CM codes listed in the referenced appendix or does not have an order for ECMO in the EHR.

Treatment (during hospitalization) Variables

Data Element Name: Template Variable: Format – Length: Mandatory: High Flow Nasal Cannula high_flow_nasal_cannula Enumerated – 1 <mark>Yes</mark>

Description:

Indicates the patient has an order for high flow nasal cannula at any time during the hospitalization.

Codes and Values:

0 = No 1 = Yes

- Report "1" when the patient has an order for high flow nasal cannula at any time during the hospital encounter.
- Report "0", if the patient does not have an order for high flow nasal cannula at any time during the hospital encounter.

Treatment (during hospitalization) Variables

Mechanical Ventilation Treatment mechanical_vent_treatment Enumerated – 1 <mark>Yes</mark>

Data Element Name: Template Variable: Format – Length: Mandatory:

Description:

Indicates the patient has an order for mechanical ventilation at any time during the hospitalization.

Codes and Values:

0 = No 1 = Yes

- Combination of ICD-10-PCS or an order from the electronic health record (EHR).
- Please see Appendix 3D for a list of applicable ICD-10-PCS codes.
- Report "1", if the patient has one or more of the ICD-10-PCS codes listed in the referenced appendix.
- Report "1", if the patient has an order for mechanical ventilation in the EHR even if they do not have one of the ICD-10-PCS codes listed in the referenced appendix.
- Report "0", if the patient does not have one of the ICD-10-CM codes listed in the referenced appendix or does not have an order for mechanical ventilation in the EHR.

| Dataset Segment: | Treatment (during hospitalization) Variables |
|--|--|
| Data Element Name: | Non-Invasive Positive Pressure Ventilation |
| Template Variable: Format – Length: | non_invasive_pos_pressure_vent Enumerated – 1 |
| Mandatory: | Yes |

Indicates the patient has an order for non-invasive-positive pressure ventilation (CPAP, BiPAP) during the hospitalization.

Codes and Values:

0 = No 1 = Yes

- Combination of ICD-10-PCS or an order from the electronic health record (EHR).
- Please see Appendix 3E for a list of applicable ICD-10-PCS codes.
- Report "1", if the patient has one or more of the ICD-10-PCS codes listed in the referenced appendix.
- Report "1", if the patient has an order for non-invasive positive pressure ventilation in the EHR even if they do not have one of the ICD-10-PCS codes listed in the referenced appendix.
- Report "0", if the patient does not have one of the ICD-10-CM codes listed in the referenced appendix or does not have an order for non-invasive positive pressure ventilation in the EHR.

Treatment (during hospitalization) Variables

Data Element Name: Template Variable: Format – Length: Mandatory:

Vasopressor Administration vasopressor_administration Enumerated – 1 Yes

Description:

Indicates the patient has an order for vasopressors during the hospitalization.

Codes and Values:

0 = No 1 = Yes

- Please see Appendix 3F for a list of applicable medications and NDC codes.
- Report "1", if the patient has one or more of the medications or NDC codes listed in the referenced appendix.
- Report "0", if the patient does not have one of the medications or NDC codes listed in the referenced appendix.

Outcome (at discharge) Variables

Data Element Name: Template Variable: Format – Length: Mandatory:

Outcome (at discharge) Variables

Cardiovascular Outcomes at Discharge cv_outcomes_at_discharge Enumerated – 1 Yes

Description:

Indicates the patient had one of the following cardiovascular_outcome(s) during the hospitalization.

Codes and Values:

0 = None

- 1 = Acute Coronary Syndrome
- 2 = Ischemic Stroke
- 3 = Myocarditis secondary to COVID-19
- 4 = Cardiomyopathy

- Report all that apply.
- Each value will be separated by a colon (:).
- For example:
 - o To report multiple elements: 1:2:3
- Please see Appendix 4A for a list of applicable ICD-10-CM codes.

Outcome (at discharge) Variables

Data Element Name: Template Variable: Format – Length: <mark>Mandatory:</mark> Dialysis Outcome dialysis_outcome Enumerated – 1 Yes

Description:

Indicates that the patient is discharged on dialysis.

Codes and Values:

0 = No 1 = Yes

- If there was a patient order to have dialysis at discharge as evidenced by dialysis on the discharge date, report "1."
- Please see Appendix 4B for a list of applicable ICD-10-CM codes.
- Report "1", if the patient has the ICD-10-CM code listed in the referenced appendix on the date of discharge.
- Report "0", if the patient does not have the ICD-10-CM code listed in the referenced appendix on the date of discharge.

Data Element Name:

Template Variable:

Outcome (at discharge) Variables

Mechanical Ventilation Outcome mechanical_vent_outcome Enumerated – 1 Yes

Format – Length: <mark>Mandatory:</mark>

Description:

Indicates the patient is discharged on mechanical ventilation.

Codes and Values:

0 = No 1 = Yes

- If there was a patient order to have mechanical ventilation at discharge as evidenced by mechanical ventilation on the discharge date, report "1".
- Please see Appendix 4C for a list of applicable ICD-10-CM codes. Report "1", if the patient has the ICD-10-CM code listed in the referenced appendix on the date of discharge.
- Report "0", if the patient does not have the ICD-10-CM code listed in the referenced appendix on the date of discharge.

Outcome (at discharge) Variables

Data Element Name: Template Variable: Format – Length: <mark>Mandatory:</mark> Tracheostomy at Discharge tracheostomy_at_discharge Enumerated – 1 Yes

Description:

Indicates that the patient was discharged with a tracheostomy.

Codes and Values:

0 = No 1 = Yes

- Please see Appendix 4D for a list of applicable ICD-10-CM codes.
- Report "1", if the patient has the ICD-10-CM code listed in the referenced appendix on the date of discharge.
- Report "0", if the patient does not have the ICD-10-CM codes listed in the referenced appendix on the date of discharge.

Outcome (during hospitalization) Variables

| Dataset Segment: | Outcome (in hospital) Variables |
|--------------------|-------------------------------------|
| Data Element Name: | Cardiovascular Outcomes in Hospital |
| Template Variable: | cv_outcomes_in_hospital |
| Format – Length: | Enumerated – 1 |
| Mandatory: | Yes |

Indicates the patient had one of the following cardiovascular_outcome(s) during the hospitalization.

Codes and Values:

- 0 = None
- 1 = Acute Coronary Syndrome
- 2 = Ischemic Stroke
- 3 = Myocarditis secondary to COVID-19

4 = Cardiomyopathy

- Report all that apply.
- Each value will be separated by a colon (:).
- For example:
 - o To report multiple elements: 1:2:3
- Please see Appendix 5A for a list of applicable ICD-10-CM codes.

Data Element Name: Template Variable: Format – Length: Mandatory:

Outcome (in hospital) Variables

ICU During Hospitalization icu_during_hospitalization Enumerated – 1 Yes

Description:

Indicate if the patient was admitted to the Intensive Care Unit (ICU; MICU; SICU; CCU; Neuro-ICU) during the hospitalization.

Codes and Values:

0 = No 1 = Yes

- Report "1", if the patient was admitted at any time to the ICU during the hospital admission.
- Report "0", if the patient was not admitted to the ICU during the hospital admission.

| Dataset Segment: | Outcome (in hospital) Variables |
|--------------------|---------------------------------|
| Data Element Name: | PE/DVT |
| Template Variable: | pe_dvt |
| Format – Length: | Enumerated – 1 |
| Mandatory: | Yes |

Indicates the patient had a pulmonary embolism (PE) and/or deep venous thrombosis (DVT) during the hospitalization.

Codes and Values:

0 = No 1 = Yes

- Please see Appendix <mark>5B</mark> for a list of applicable ICD-10-CM codes.
- Report "1", if the patient has one or more of the ICD-10-CM codes listed in the referenced appendix.
- Report "0", if the patient does not have one of the ICD-10-CM codes listed in the referenced appendix.

Outcome (in hospital) Variables

Data Element Name: Template Variable: Format – Length: Mandatory: Tracheostomy in Hospital tracheostomy_in_hospital Enumerated – 1 Yes

Description:

Indicates that the patient had a tracheostomy during the hospitalization prior to the discharge date.

Codes and Values:

0 = No 1 = Yes

- If the patient received a tracheotomy at arrival or during the hospitalization, report "1."
- Please see Appendix <mark>5C</mark> for a list of applicable ICD-10-PCS codes.
- Report "1", if the patient has one or more of the ICD-10-PCS codes listed in the referenced appendix.
- Report "0", if the patient does not have one or more of the ICD-10-PCS codes listed in the referenced appendix.

Severity Variables

| Dataset Segment: | Severity Variables |
|--------------------|--------------------|
| Data Element Name: | aPTT 1 |
| Template Variable: | aptt_1 |
| Format – Length: | String – 8 |
| Mandatory: | No |

Indicates the first activated partial thromboplastin time (aPTT) level collected after arrival to the hospital.

| Dataset Segment: | Severity Variables |
|--------------------|--------------------|
| Data Element Name: | aPTT 2 |
| Template Variable: | aptt_2 |
| Format – Length: | String – 8 |
| Mandatory: | No |

Description:

Indicates the second aPTT value collected after arrival to the hospital.

| Dataset Segment: | Severity Variables |
|--------------------|--------------------|
| Data Element Name: | aPTT 3 |
| Template Variable: | aptt_3 |
| Format – Length: | String – 8 |
| Mandatory: | No |

Description:

Indicates the third aPTT level collected after arrival to the hospital.

| Dataset Segment: | Severity Variables |
|--------------------|--------------------|
| Data Element Name: | aPTT Max |
| Template Variable: | aptt_max |
| Format – Length: | String – 8 |
| Mandatory: | No |

Indicates the first maximum aPTT value collected after arrival to the hospital.

Codes and Values:

Enter the aPTT levels.

- *aPTT 1/2/3/Max* and corresponding datetimes are situational because hospitals may not always have values to report.
- For all labs, if the initial lab collected was contaminated or determined questionable (e.g., did not result), report the result of the subsequent lab collected.
- When there are multiple identical MAX values, report the first one after the patient's arrival to the hospital.
- Must be reported to one decimal place (example 19.8). For example, 30.7 or 30.0; place hold with 0.
 - If your EHR allows the capture and the extraction of "<" (less than) or ">" (greater than) sign for this lab, please report "<" (less than) or ">" (greater than) sign with the value as well. If your EHR does not capture this, you may simply report the numeric value. For example <0.1, should be reported as <0.1.
- If the aPTT level was reported by the lab with more than one decimal place, use the rules of rounding to convert the number to one decimal place.
- Do not just truncate the number in order to convert it to one decimal place.
- Examples of rounding the aPTT level results:
 - o 30.48 is rounded to 30.5
 - o 45.43 is rounded to 45.4
 - o 61.75 is rounded to 61.8
 - o 55.97 is rounded to 56.0
 - NOT CORRECT: 61.75 is truncated to 61.7 (this should be rounded to 61.8)

| Dataset Segment: | Severity Variables |
|--------------------|--------------------|
| Data Element Name: | aPTT Datetime 1 |
| Template Variable: | aptt_dt_1 |
| Format – Length: | Datetime – 16 |
| Mandatory: | No |

Indicates the date and time of the first aPTT level collected after the patient's arrival to the hospital.

| Dataset Segment: | Severity Variables |
|--------------------|--------------------|
| Data Element Name: | aPTT Datetime 2 |
| Template Variable: | aptt_dt_2 |
| Format – Length: | Datetime – 16 |
| Mandatory: | No |

Description:

Indicates the date and time of the second aPTT level collected after the patient's arrival to the hospital.

| Dataset Segment: | Severity Variables |
|--|---|
| Data Element Name: Template Variable: | aPTT Datetime 3 <mark>aptt_dt_3</mark> |
| Format – Length: | Datetime – 16 |
| <mark>Mandatory:</mark> | No |

Description:

Indicates the date and time of the third aPTT level collected after the patient's arrival to the hospital.

| Dataset Segment: | Severity Variables |
|--|---|
| Data Element Name: Template Variable: | aPTT Datetime Max <mark>aptt_dt_max</mark> |
| Format – Length: | Datetime – 16 |
| Mandatory: | No |

Indicates the date and time of the first maximum aPTT level collected after the patient's arrival to the hospital.

Codes and Values:

Enter the aPTT Datetimes.

- aPTT 1/2/3/Max Datetimes are situational because hospitals may not always have values to report.
 - If any aPTT is reported then the datetime for the aPTT should be reported. For example, if aPTT 1 has a value, then aPTT Datetime 1 should not be blank.
- For all labs, if the initial lab collected was contaminated or determined questionable (e.g., did not result), report the result and the date and time of the subsequent lab collected.
- When there are multiple identical MAX values, report the first one after the patient's arrival to the hospital.
- This element belongs to Organ Dysfunction Hematologic.
- <u>Formatting:</u>
 - 1. Format must be YYYY-MM-DD hh:mm
 - a. YYYY-MM-DDThh:mm is also valid
 - YYYY = four-digit year
 MM = two-digit month (01 = January, etc.)
 DD = two-digit day of month (01 through 31)
 hh = two digits of hour (00 through 23) (am/pm NOT allowed)
 mm = two digits of minute (00 through 59)
 - 3. Example: 11:42 pm November 3, 1959 = 1959-11-03 23:42
 a. 1959-11-03T23:42 is also valid
 - 4. Midnight = 00:00, **NOT** 24:00

| Dataset Segment: | Severity Variables |
|--------------------|-------------------------|
| Data Element Name: | Bilirubin Arrival |
| Template Variable: | bilirubin_arrival |
| Format – Length: | String – <mark>6</mark> |
| Mandatory: | No |

Indicates the first total bilirubin level collected after the patient's arrival to the hospital.

| Dataset Segment: | Severity Variables |
|--------------------|-------------------------|
| Data Element Name: | Bilirubin Max |
| Template Variable: | bilirubin_max |
| Format – Length: | String – <mark>6</mark> |
| Mandatory: | No |

Description:

Indicates the first maximum total bilirubin level collected after arrival to the hospital.

Codes and Values:

Enter the actual total bilirubin levels. Convert the units to mg/dL if needed.

- Bilirubin Arrival/Max and corresponding datetimes are situational because hospitals may not always have values to report.
- For all labs, if the initial lab collected was contaminated or determined questionable (e.g., did not result), report the result of the subsequent lab collected.
- When there are multiple identical MAX values, report the first one after the patient's arrival to the hospital.
- Must be reported to one decimal place (example 2.8).
 - If your EHR allows the capture and the extraction of "<" (less than) or ">" (greater than) sign for this lab, please report "<" (less than) or ">" (greater than) sign with the value as well. If your EHR does not capture this, you may simply report the numeric value. For example <0.1, should be reported as <0.1.
- If the total bilirubin level was reported by the lab with more than one decimal place, use the rules of rounding to convert the number to one decimal place.
- Do not just truncate the number in order to convert it to one decimal place.
- Examples of rounding total bilirubin level results:
 - o 2.51 is rounded to 2.5

- o .75 is rounded to .8
- o 1.97 is rounded to 2.0
- NOT CORRECT: .75 is truncated to .7 (this should be rounded to .8)

Data Element Name: Template Variable: Format – Length: <mark>Mandatory:</mark>

Severity Variables

Bilirubin Arrival Datetime bilirubin_arrival_dt Datetime – 16 <mark>No</mark>

Description:

Indicates the date and time of the first total bilirubin collected after the patient's arrival to the hospital.

| Dataset Segment: | Severity Variables |
|--------------------|------------------------|
| Data Element Name: | Bilirubin Max Datetime |
| Template Variable: | bilirubin_max_dt |
| Format – Length: | Datetime – 16 |
| Mandatory: | No |

Description:

Indicates the date and time of the first maximum total bilirubin level collected after arrival to the hospital.

Codes and Values:

Enter the total Bilirubin Datetimes.

- Bilirubin Arrival/Max Datetimes are situational because hospitals may not always have values to report.
 - If any Organ Dysfunction Hepatic is reported then the datetime for Organ
 Dysfunction Hepatic should be reported. For example, if Bilirubin Arrival has a value, Bilirubin Arrival Datetime should not be blank.
- For all labs, if the initial lab collected was contaminated or determined questionable (e.g., did not result), report the result and the date and time of the subsequent lab collected.
- When there are multiple identical MAX values, report the first one after the patient's arrival to the hospital.

- Formatting:

 - 3. Example: 11:42 pm November 3, 1959 = 1959-11-03 23:42
 a. 1959-11-03T23:42 is also valid
 - 4. Midnight = 00:00, **NOT** 24:00

| Dataset Segment: | Severity Variables |
|--------------------|--------------------|
| Data Element Name: | Creatinine Arrival |
| Template Variable: | creatinine_arrival |
| Format – Length: | String – 4 |
| Mandatory: | No |

Indicates the first creatinine level collected after the patient's arrival to the hospital.

| Dataset Segment: | Severity Variables |
|--------------------|--------------------|
| Data Element Name: | Creatinine Max |
| Template Variable: | creatinine_max |
| Format – Length: | String – 4 |
| Mandatory: | No |

Description:

Indicates the first maximum creatinine level collected after the patient's arrival to the hospital.

Codes and Values:

Enter the actual Creatinine levels. Convert the units to mg/dL if needed.

- Creatinine Arrival/Max and corresponding datetimes are situational because hospitals may not always have values to report.
- For all labs, if the initial lab collected was contaminated or determined questionable (e.g., did not result), report the result of the subsequent lab collected.
- When there are multiple identical MAX values, report the first one after the patient's arrival to the hospital.
- Must be reported to one decimal place (example 2.8).
 - If your EHR allows the capture and the extraction of "<" (less than) or ">" (greater than) sign for this lab, please report "<" (less than) or ">" (greater than) sign with the value as well. If your EHR does not capture this, you may simply report the numeric value. For example <0.1, should be reported as <0.1.
- If the creatinine level was reported by the lab with more than one decimal place, use the rules of rounding to convert the number to one decimal place.
- Do not just truncate the number in order to convert it to one decimal place.
- Examples of rounding creatinine level results:

- o 2.81 is rounded to 2.8
- o 1.75 is rounded to 1.8
- o 1.42 is rounded to 1.4
- o 2.97 is rounded to 3.0
- NOT CORRECT: 1.75 is truncated to 1.7 (this should be rounded to 1.8)

| Dataset Segment: | Severity Variables |
|--------------------|-----------------------------|
| Data Element Name: | Creatinine Arrival Datetime |
| Template Variable: | creatinine_arrival_dt |
| Format – Length: | Datetime – 16 |
| Mandatory: | No |

Indicates the date and time of the first creatinine level collected after the patient's arrival to the hospital.

| Dataset Segment: | Severity Variables |
|--------------------|-------------------------|
| Data Element Name: | Creatinine Max Datetime |
| Template Variable: | creatinine_max_dt |
| Format – Length: | Datetime – 16 |
| Mandatory: | No |

Description:

Indicates the date and time of the first maximum creatinine level collected after the patient's arrival to the hospital.

Codes and Values:

Enter the Creatinine Datetimes.

- Creatinine Arrival/Max Datetimes are situational because hospitals may not always have values to report
 - If any Organ Dysfunction Renal is reported then the datetime for Organ Dysfunction Renal value should be reported. For example, if <u>Creatinine Arrival</u> has a value, <u>Greatinine Arrival Datetime</u> should not be blank.
- For all labs, if the initial lab collected was contaminated or determined questionable (e.g., did not result), report the result and the date and time of the subsequent lab collected.
- When there are multiple identical MAX values, report the first one after the patient's arrival to the hospital.
- Formatting:
 - 1. Format must be YYYY-MM-DD hh:mm
 - a. YYYY-MM-DDThh:mm is also valid
 - YYYY = four-digit year
 MM = two-digit month (01 = January, etc.)

DD = two-digit day of month (01 through 31)

hh = two digits of hour (00 through 23) (am/pm NOT allowed) mm = two digits of minute (00 through 59)

- 3. Example: 11:42 pm November 3, 1959 = 1959-11-03 23:42
 a. 1959-11-03T23:42 is also valid
- 4. Midnight = 00:00, **NOT** 24:00

| Dataset Segment: | Severity Variables |
|--------------------|--------------------|
| Data Element Name: | Diastolic First |
| Template Variable: | diastolic_1 |
| Format – Length: | Number – 3 |
| Mandatory: | Yes |

Indicates the patient's first diastolic blood pressure collected after arrival to the hospital.

| Dataset Segment: | Severity Variables |
|--------------------|--------------------|
| Data Element Name: | Diastolic Second |
| Template Variable: | diastolic _2 |
| Format – Length: | Number – 3 |
| Mandatory: | No |

Description:

Indicate the patient's second diastolic blood pressure collected after arrival to the hospital.

| Dataset Segment: | Severity Variables |
|--------------------|--------------------|
| Data Element Name: | Diastolic Third |
| Template Variable: | diastolic_3 |
| Format – Length: | Number – 3 |
| Mandatory: | No |

Description:

Indicate the patient's third diastolic blood pressure collected after arrival to the hospital.

| Dataset Segment: | Severity Variables |
|--------------------|--------------------|
| Data Element Name: | Diastolic Min |
| Template Variable: | diastolic _min |
| Format – Length: | Number – 3 |
| Mandatory: | No |

Indicates the patient's first minimum diastolic blood pressure collected after arrival to the hospital.

Codes and Values:

Enter the actual Diastolic Values.

- Diastolic First and corresponding Diastolic First Datetime 1 are mandatory. However, Diastolic Second, Diastolic Third, and Diastolic Min and corresponding datetimes are situational because hospitals may not always have values to report (i.e., additional values not collected).
 - If any Diastolic is reported then the datetime for the Diastolic value should be reported. For example, if *Diastolic Second* has a value, then *Diastolic Second Datetime 2* should not be blank.
- For all vital signs (i.e., diastolic pressure, systolic pressure, heart rate, respiratory rate, temperature), if the initial vital sign collected was invalid or determined questionable (e.g., instrumentation error), report the value and the date and time of the subsequent vital sign collected.
- When there are multiple identical MIN values, report the first one after the patient's arrival to the hospital.
- If the blood pressure is measured as mean arterial pressure (MAP), report the subsequent blood pressure measured as systolic/diastolic pressures.
- <u>Formatting:</u>
- Format must be a number up to 3 digits.
 - 1. Example:
 - a. Diastolic blood pressure 80mm Hg should be reported as 80
 - b. Diastolic blood pressure 112 Hg should be reported as 112

| Dataset Segment: | Severity Variables |
|--------------------|----------------------------|
| Data Element Name: | Diastolic First Datetime 1 |
| Template Variable: | diastolic _dt_1 |
| Format – Length: | Datetime – 16 |
| Mandatory: | Yes |

Indicates the date and time of the first diastolic blood pressure collected after the patient's arrival to the hospital.

| Dataset Segment: | Severity Variables |
|--------------------|-----------------------------|
| Data Element Name: | Diastolic Second Datetime 2 |
| Template Variable: | diastolic _dt_2 |
| Format – Length: | Datetime – 16 |
| Mandatory: | No |

Description:

Indicates the date and time of the second diastolic blood pressure collected after the patient's arrival to the hospital.

| Dataset Segment: | Severity Variables |
|--------------------|----------------------------|
| Data Element Name: | Diastolic Third Datetime 3 |
| Template Variable: | diastolic _dt_3 |
| Format – Length: | Datetime – 16 |
| Mandatory: | No |

Description:

Indicates the date and time of the third diastolic blood pressure collected after the patient's arrival to the hospital.

| Dataset Segment: | Severity Variables |
|--|---|
| Data Element Name: | Diastolic Datetime Min |
| Template Variable: Format – Length: | <mark>diastolic _dt_min</mark> Datetime – 16 |
| Mandatory: | No |

Indicates the date and time of the first minimum diastolic blood pressure collected after the patient's arrival to the hospital.

Codes and Values:

Enter the Diastolic Datetimes.

- Diastolic First Datetime 1 is mandatory. However, Diastolic Second Datetime 2, Diastolic Third Datetime 3, Diastolic Datetime Min are situational because hospitals may not always have values to report (i.e., additional values not collected).
 - If any Diastolic is reported then the datetime for the Diastolic value should be reported. For example, if *Diastolic Second* has a value, then *Diastolic Second Datetime 2* should not be blank.
- For all vital signs (i.e., diastolic pressure, systolic pressure, heart rate, respiratory rate, temperature), if the initial vital sign collected was invalid or determined questionable (e.g., instrumentation error), report the value and the date and time of the subsequent vital sign collected.
- When there are multiple identical MIN values, report the first one after the patient's arrival to the hospital.
- If the blood pressure is measured as mean arterial pressure (MAP), report the subsequent blood pressure measured as systolic/diastolic pressures.
- <u>Formatting:</u>

 a. 1959-11-03T23:42 is also valid
 - a. 1959-11-03123:42 Is also va
 - 4. Midnight = 00:00, **NOT** 24:00

| Dataset Segment: | Severity Variables |
|--------------------|--------------------|
| Data Element Name: | INR 1 |
| Template Variable: | inr_1 |
| Format – Length: | String – 4 |
| Mandatory: | No |

Indicates the first INR value collected after the patient's arrival to the hospital.

| Dataset Segment: | Severity Variables |
|--------------------|--------------------|
| Data Element Name: | INR 2 |
| Template Variable: | inr_2 |
| Format – Length: | String – 4 |
| Mandatory: | No |

Description:

Indicates the second INR level collected after the patient's arrival to the hospital.

| Dataset Segment: | Severity Variables |
|--------------------|--------------------|
| Data Element Name: | INR 3 |
| Template Variable: | inr_3 |
| Format – Length: | String – 4 |
| Mandatory: | No |

Description:

Indicates the third INR level collected after the patient's arrival to the hospital.

| Dataset Segment: | Severity Variables |
|--------------------|--------------------|
| Data Element Name: | INR Max |
| Template Variable: | inr_max |
| Format – Length: | String – 4 |
| Mandatory: | No |

Description:

Indicates the first maximum INR level collected after the patient's arrival to the hospital.

Codes and Values:

Enter the actual INR levels.

- *INR 1/2/3/Max* and corresponding datetimes are situational because hospitals may not always have values to report.
- For all labs, if the initial lab collected was contaminated or determined questionable (e.g., did not result), report the result of the subsequent lab collected.
- When there are multiple identical MAX values, report the first one after the patient's arrival to the hospital.
- Must be reported to one decimal place (example 1.2 or 11.5).
 - If your EHR allows the capture and the extraction of "<" (less than) or ">" (greater than) sign for this lab, please report "<" (less than) or ">" (greater than) sign with the value as well. If your EHR does not capture this, you may simply report the numeric value. For example <0.1, should be reported as <0.1.
- If the INR level was reported by the lab with more than one decimal place, use the rules of rounding to convert the number to one decimal place.
- Do not just truncate the number in order to convert it to one decimal place.
- Examples of rounding INR level results:
 - o 2.48 is rounded to 2.5
 - o 11.75 is rounded to 11.8
 - o 2.97 is rounded to 3.0
 - NOT CORRECT: 11.75 is truncated to 11.7 (this should be rounded to 11.8)

| Dataset Segment: | Severity Variables |
|--------------------|--------------------|
| Data Element Name: | INR Datetime 1 |
| Template Variable: | inr_dt_1 |
| Format – Length: | Datetime – 16 |

|--------------------|--------------------|
| Data Element Name: | Platelets Min |
| Template Variable: | platelets_min |
| Format – Length: | String — 10 |
| Mandatory: | No |

Description:

Indicates the first minimum platelet level collected after the patient's arrival to the hospital.

Codes and Values:

Enter the actual Platelet levels. Convert the units to cells/uL if needed.

- *Platelets 1/2/3/vin* and corresponding datetimes are situational because hospitals may not always have values to report.
- For all labs, if the initial lab collected was contaminated or determined questionable (e.g., did not result), report the result of the subsequent lab collected.
- When there are multiple identical MIN values, please report the first one after the patient's arrival to the hospital.
- Must be reported to one decimal place (example 2.8).
 - If your EHR allows the capture and the extraction of "<" (less than) or ">" (greater than) sign for this lab, please report "<" (less than) or ">" (greater than) sign with the value as well. If your EHR does not capture this, you may simply report the numeric value. For example, <0.1, should be reported as <0.1.
- This element belongs to Organ Dysfunction Hematologic.
- Formatting:
 - 1. Format must be a string up to 10-digits long.
 - 2. Example:
 - a. Platelet 320,000/uL should be reported as 320000
 - b. Platelet 60,000/uL should be reported as 60000

| Dataset Segment: | Severity Variables |
|--------------------|----------------------|
| Data Element Name: | Platelets Datetime 1 |
| Template Variable: | platelets_dt_1 |
| Format – Length: | Datetime – 16 |
| Mandatory: | No |

Indicates the date and time of the first platelet level collected after the patient's arrival to the hospital.

| Dataset Segment: | Severity Variables |
|--------------------|----------------------|
| Data Element Name: | Platelets Datetime 2 |
| Template Variable: | platelets_dt_2 |
| Format – Length: | Datetime – 16 |
| Mandatory: | No |

Description:

Indicates the date and time of the second platelet level collected after the patient's arrival to the hospital.

| Dataset Segment: | Severity Variables |
|--------------------|----------------------|
| Data Element Name: | Platelets Datetime 3 |
| Template Variable: | platelets_dt_3 |
| Format – Length: | Datetime – 16 |
| Mandatory: | No |

Description:

Indicates the date and time of the third platelet level collected after the patient's arrival to the hospital.

| Dataset Segment: | Severity Variables |
|--|--|
| Data Element Name: | Platelets Datetime Min |
| Template Variable: Format – Length: | <mark>platelets_dt_min</mark> Datetime – 16 |
| Mandatory: | No |

Indicates the date and time of the first minimum platelet level collected after the patient's arrival to the hospital.

Codes and Values:

Enter the Platelets Datetimes.

- Platelets 1/2/3/win Datetimes are situational because hospitals may not always have values to report.
 - If any Platelets are reported then the datetime for the Platelets value should be reported. For example, if *Platelets 1* has a value, *Platelets Datetime 1* should not be blank.
- For all labs, if the initial lab collected was contaminated or determined questionable (e.g., did not result), report the result and the date and time of the subsequent lab collected.
- When there are multiple identical MIN values, report the first one after the patient's arrival to the hospital.
- This element belongs to Organ Dysfunction Hematologic.
- <u>Formatting:</u>
 - 1. Format must be YYYY-MM-DD hh:mm
 - a. YYYY-MM-DDThh:mm is also valid
 - YYYY = four-digit year
 MM = two-digit month (01 = January, etc.)
 DD = two-digit day of month (01 through 31)
 hh = two digits of hour (00 through 23) (am/pm NOT allowed)
 mm = two digits of minute (00 through 59)
 - 3. Example: 11:42 pm November 3, 1959 = 1959-11-03 23:42
 - a. 1959-11-03T23:42 is also valid
 - 4. Midnight = 00:00, **NOT** 24:00

| Dataset Segment: | Severity Variables |
|--------------------|--------------------|
| Data Element Name: | SIRS Heart Rate 1 |
| Template Variable: | sirs_heartrate_1 |
| Format – Length: | Enumerated— 3 |
| Mandatory: | Yes |

Indicates the first heart rate value collected after the patient's arrival to the hospital.

| Dataset Segment: | Severity Variables |
|--------------------|--------------------|
| Data Element Name: | SIRS Heart Rate 2 |
| Template Variable: | sirs_heartrate_2 |
| Format – Length: | Enumerated — 3 |
| Mandatory: | No |

Description:

Indicates the second heart rate value collected after the patient's arrival to the hospital.

| Dataset Segment: | Severity Variables |
|--------------------|--------------------|
| Data Element Name: | SIRS Heart Rate 3 |
| Template Variable: | sirs_heartrate_3 |
| Format – Length: | Enumerated — 3 |
| Mandatory: | No |

Description:

Indicates the third heart rate value collected after the patient's arrival to the hospital.

| Dataset Segment: | Severity Variables |
|--------------------|---------------------|
| Data Element Name: | SIRS Heart Rate Max |
| Template Variable: | sirs_heartrate_max |
| Format – Length: | Enumerated — 3 |
| Mandatory: | No |

Description:

Indicates the first maximum heart rate value collected after the patient's arrival to the hospital.

Codes and Values:

Enter the actual Heart Rates.

- SIRS Heart Rate 1 and corresponding SIRS Heart Rate Datetime 1 are mandatory. However, SIRS Heart Rate 2, SIRS Heart Rate 3, and SIRS Heart Rate Max and corresponding datetimes are situational because hospitals may not always have values to report (i.e., additional values not collected).
 - a. If SIRS Heart Rate 2, SIRS Heart Rate 3, and/or SIRS Heart Rate Max are collected then these values and their corresponding datetimes must be reported.
- For all vital signs (i.e., diastolic pressure, systolic pressure, heart rate, respiratory rate, temperature), if the initial vital sign collected was invalid or determined questionable (e.g., instrumentation error), report the value and the date and time of the subsequent vital sign collected.
- When there are multiple identical MAX values, report the first one after the patient's arrival to the hospital.
- <u>Formatting:</u>
 - 1. Format must be a number up to 3 digits.
 - 2. Example:
 - a. Heart rate/Pulse 100 beats per minutes (bpm) should be reported as 100
 - b. Heart rate/Pulse 43 beats per minutes (bpm) should be reported as 43

 YYYY-MM-DDThh:mm is also valid
 - YYYY = four-digit year
 MM = two-digit month (01 = January, etc.)
 DD = two-digit day of month (01 through 31)
 hh = two digits of hour (00 through 23) (am/pm NOT allowed)
 mm = two digits of minute (00 through 59)
 - 3. Example: 11:42 pm November 3, 1959 = 1959-11-03 23:42
 a. 1959-11-03T23:42 is also valid
 - 4. Midnight = 00:00, **NOT** 24:00

Change Log

Version D2.1.1

- Changes from version D2.1 to D2.1.1 are highlighted in green.
- For consistency reasons and alignment with the upcoming pediatric data dictionary all labbased severity variables are named after the lab while all ICD-10-CM code-based severity variables are named organ dysfunction and organ name.
 - Specifically, the existing lab-based variables *Organ Dysfunction Hepatic* and *Datetime* was renamed *Bilirubin Arrival, Max,* and *Datetime*. A new ICD-10-CM code-based variable *Organ Dysfunction Hepatic* was added.
 - Specifically, the existing lab-based variable *Organ Dysfunction Renal* and *Datetime* was renamed *Creatinine Arrival, Max,* and *Datetime*. A new ICD-10-CM code-based variable *Organ Dysfunction Renal* was added.
- New data elements were added:
 - Organ Dysfunction Cardiovascular
 - Organ Dysfunction Hematologic
 - Organ Dysfunction Hepatic
 - Organ Dysfunctin Renal
 - Cardiovascular Outcomes at Discharge
- Variable value was updated for the following variables:
 - Patient Care Considerations
 - Cardiovascular Outcomes in Hospital
 - History of Cardivascular Disease
 - Lactate Level 1
 - o Lactate Level 2
 - o Lactate Level 3
 - o Lactate Level Max
 - Patient Care Considerations
 - o Payer
- Data element name and template variable name were updated for the following variables:
 - o Bilirubin Arrival
 - o Bilirubin Max
 - o Bilirubin Arrival Datetime
 - Bilirubin Max Datetime
 - Cardiovascular Outcomes in Hospital
 - Creatinine Arrival
 - Creatinine Max
 - Creatinine Arrival Datetime
 - Creatinine Max Datetime
- Variable length was updated for the following variables:
 - o **aPTT 1**
 - o **aPTT 2**
 - o **aPTT 3**

- o aPTT Max
- o Bilirubin Arrival
- o Bilirubin Max
- o Platelets 1
- o Platelets 2
- o Platelets 3
- o Platelets Min
- SIRS Leukocyte Arrival
- o SIRS Leukocyte Min
- o SIRS Leukocyte Max
- Notes of abstraction were updated for the following variables
 - o *aPTT 1, 2, 3, MAX* and corresponding *Datetimes*
 - o Bilirubin Arrival and MAX and corresponding Datetimes
 - o Cardiovascular Outcomes in Hospital
 - o Creatinine Arrival, MAX and corresponding Datetimes
 - o Diastolic First, Second, Third, MIN and corresponding Datetimes
 - INR 1, 2, 3, MAX and corresponding Datetimes
 - o Lactate Level 1, 2, 3, MAX and corresponding Datetimes
 - Organ Dysfunction CNS
 - Organ Dysfunction Respiratory
 - Platelets 1, 2, 3, MIN and corresponding Datetimes
 - o SIRS Heart Rate 1, 2, 3, Max and corresponding Datetimes
 - o SIRS Leukocyte Arrival, MIN, MAX and corresponding Datetimes
 - o SIRS Respiratory Rate 1, 2, 3, Max and corresponding Datetimes
 - o SIRS Temparture 1, 2, 3, Max and corresponding Datetimes
 - o Diastolic First, Second, Third, Min and corresponding Datetimes
 - Systolic First, Second, Third, Max and corresponding Datetimes
- Several appendices were added. Be sure to review Appendices D2.1.1 change log for the specific variables that were added. The following appendices were added:
 - Appendix 4A: Cardiovascular Outcomes at Discharge ICD-10 CM Codes
 - Appendix 6A: Organ Dysfunction Cardiovascular ICD-10 CM Codes
 - Appendix 6C: Organ Dysfunction Hematologic ICD-10-CM Codes
 - Appendix 6D: Organ Dysfunction Hepatic ICD-10 CM Codes
 - Appendix 6E: Organ Dysfunction Renal ICD-10 CM Codes
- The numbers of the following appendices were updated:
 - o Appendix 5A: Cardiovascular Outcomes in Hospital ICD-10-CM Codes
 - Appendix 5B: Pulmonary Embolism (PE) and/or Deep Venous Thrombosis (DVT)
 Outcome ICD-10-CM Codes
 - o Appendix 5C: Tracheostomy in Hospital ICD-10-PCS Codes
 - \circ Appendix 6B: Organ Dysfunction CNS Severity ICD-10-CM Codes
 - o Appendix 6F: Organ Dysfunction Respiratory Severity ICD-10-CM Codes
- The following appendices were updated to include additional codes:
 - Appendix 1A: Acute Cardiovascular Comorbidity / Risk Factor (POA) ICD-10 CM Codes

- Appendix 1N: History of Other Cardiovascular Comorbidity / Risk Factor (POA) ICD-10-CM Codes
- Appendix 4E: Cardiovascular Outcomes in Hospital ICD-10-CM Codes
- The names of the following appendices were updated:
 - Appendix 1A: Acute Cardiovascular Conditions Comorbidity / Risk Factor (POA) ICD-10 CM Codes
 - Appendix 1N: History of Other Cardiovascular Disease Comorbidity / Risk Factor (POA) ICD-10-CM Codes
 - o Appendix 1W: Pregnancy Comorbidity / Risk Factor (POA) ICD-10 CM Codes
 - o Appendix 4E: Cardiovascular Outcomes in Hospital ICD-10-CM Codes

Version D2.1

- Changes from version D2.0 to D2.1 are highlighted in yellow.
- Please review *Key points to remember during data extraction* in detail as several paragraphs were modified.
- One code (J1282 Pneumonia due to coronavirus disease 2019) was added to Table B in *Inclusion Definition* on page 10.
- One code (R0602 Shortness of breath) on Table B in *Inclusion Definition* on page 11 was corrected to include a missing 0.
- *Ethnicity* was updated to align with SPARCS code set.
- Data Element Name of History of COVID-19 Date changed to History of COVID-19 Datetime
- Five new data elements were added:
 - Other Payer
 - o Transferred In
 - o Transferred Out
 - Transfer Facility Name Receiving
 - Transfer Facility Name Sending
- Description was updated for the following variables:
 - Transfer Facility Identifier Receiving
 - Transfer Facility Identifier Sending
- The Data Segment section *Header* was changed to include the data element reporting requirement to indicate mandatory yes or no. The following variables were changed from mandatory to optional because hospitals may not always have values to report.
 - History of COVID-19 Datetime
 - Patient Care Considerations Date
 - o **aPTT 1**
 - o **aPTT 2**
 - o **aPTT 3**
 - o aPTT Max
 - o aPTT Datetime 1
 - o aPTT Datetime 2

- o aPTT Datetime 3
- o aPTT Datetime Max
- Arrival Datetime
- Diastolic Second
- Diastolic Third
- Diastolic Min
- Diastolic Second Datetime 2
- o Diastolic Third Datetime 3
- Diastolic Datetime Min
- o **INR 1**
- o INR 2
- o INR 3
- o INR Max
- o INR Datetime 1
- o INR Datetime 2
- o INR Datetime 3
- o INR Datetime Max
- o Lactate Level 1
- o Lactate Level 2
- o Lactate Level 3
- Lactate Level Max
- Lactate Level Datetime 1
- o Lactate Level Datetime 2
- o Lactate Level Datetime 3
- Lactate Level Datetime Max
- Organ Dysfunction Hepatic Arrival
- Organ Dysfunction Hepatic Max
- o Organ Dysfunction Hepatic Arrival Datetime
- Organ Dysfunction Hepatic Max Datetime
- Organ Dysfunction Renal Arrival
- Organ Dysfunction Renal Max
- **o** Organ Dysfunction Renal Arrival Datetime
- Organ Dysfunction Renal Max Datetime
- Platelets 1
- o Platelets 2
- Platelets 3
- o Platelets Min
- o Platelets Datetime 1
- o Platelets Datetime 2
- Platelets Datetime 3
- o Platelets Datetime Min
- o SIRS Heart Rate 2
- o SIRS Heart Rate 3
- o SIRS Heart Rate Max

- SIRS Heart Rate Datetime 2
- SIRS Heart Rate Datetime 3
- o SIRS Heart Rate Datetime Max
- SIRS Leukocyte Arrival
- SIRS Leukocyte Min
- SIRS Leukocyte Max
- SIRS Leukocyte Arrival Datetime
- SIRS Leukocyte Min Datetime
- SIRS Leukocyte Max Datetime
- SIRS Respiratory Rate 2
- SIRS Respiratory Rate 3
- SIRS Respiratory Rate Max
- SIRS Respiratory Rate Datetime 2
- SIRS Respiratory Rate Datetime 3
- SIRS Respiratory Rate Datetime Max
- SIRS Temperature 2
- SIRS Temperature 3
- SIRS Temperature Max
- SIRS Temperature Datetime 2
- SIRS Temperature Datetime 3
- SIRS Temperature Datetime Max
- Systolic Second
- Systolic Third
- Systolic Min
- Systolic Second Datetime 2
- Systolic Third Datetime 3
- o Systolic Datetime Min
- Format Length, Notes of Abstraction were updated for the following variables:
 - *ICD-10-CM Code (n)*
 - Payer
 - History of Other Cardiovascular Disease
 - o **Race**
 - Patient Care Considerations
 - Suspected Source of Infection
 - o **aPTT 1**
 - o **aPTT 2**
 - o **aPTT 3**
 - o aPTT Max
 - o aPTT Datetime 1
 - o aPTT Datetime 2
 - o aPTT Datetime 3
 - o aPTT Datetime Max
 - Diastolic First
 - Diastolic Second

- Diastolic Third
- Diastolic Min
- o Diastolic First Datetime 1
- Diastolic Second Datetime 2
- o Diastolic Third Datetime 3
- o Diastolic Datetime Min
- o **INR 1**
- o **INR 2**
- o INR 3
- o INR Max
- o INR Datetime 1
- o INR Datetime 2
- INR Datetime 3
- INR Datetime Max
- o Lactate Level 1
- Lactate Level 2
- o Lactate Level 3
- Lactate Level Max
- Lactate Level Datetime 1
- o Lactate Level Datetime 2
- Lactate Level Datetime 3
- o Lactate Level Datetime Max
- **o** Organ Dysfunction CNS
- Organ Dysfunction Hepatic Arrival
- Organ Dysfunction Hepatic Max
- o Organ Dysfunction Hepatic Arrival Datetime
- Organ Dysfunction Hepatic Max Datetime
- Organ Dysfunction Renal Arrival
- Organ Dysfunction Renal Max
- **o** Organ Dysfunction Renal Arrival Datetime
- **o** Organ Dysfunction Renal Max Datetime
- Organ Dysfunction Respiratory
- o Platelets 1
- o Platelets 2
- o Platelets 3
- o Platelets Min
- o Platelets Datetime 1
- Platelets Datetime 2
- o Platelets Datetime 3
- Platelets Datetime Min
- o SIRS Heart Rate 1
- o SIRS Heart Rate 2
- o SIRS Heart Rate 3
- o SIRS Heart Rate Max

- SIRS Heart Rate Datetime 1
- SIRS Heart Rate Datetime 2
- SIRS Heart Rate Datetime 3
- o SIRS Heart Rate Datetime Max
- SIRS Leukocyte Arrival
- o SIRS Leukocyte Min
- SIRS Leukocyte Max
- SIRS Leukocyte Arrival Datetime
- SIRS Leukocyte Min Datetime
- SIRS Leukocyte Max Datetime
- SIRS Respiratory Rate 1
- o SIRS Respiratory Rate 2
- SIRS Respiratory Rate 3
- o SIRS Respiratory Rate Max
- SIRS Respiratory Rate Datetime 1
- SIRS Respiratory Rate Datetime 2
- SIRS Respiratory Rate Datetime 3
- SIRS Respiratory Rate Datetime Max
- SIRS Temperature 1
- SIRS Temperature 2
- SIRS Temperature 3
- SIRS Temperature Max
- SIRS Temperature Datetime 1
- SIRS Temperature Datetime 2
- SIRS Temperature Datetime 3
- SIRS Temperature Datetime Max
- Systolic Second
- Systolic Third
- Systolic Min
- Systolic Second Datetime 2
- Systolic Third Datetime 3
- Systolic Datetime Min
- Variable names were changed for the following variables from "datetime" to "dt" to provide more consistency:
 - Admission Datetime
 - o Arrival Datetime
 - o Discharge Datetime
 - o aPTT Datetime 1
 - o aPTT Datetime 2
 - o aPTT Datetime 3
 - o aPTT Datetime Max
 - o Diastolic First Datetime 1
 - Diastolic Second Datetime 2
 - Diastolic Third Datetime 3

- Diastolic Datetime Min
- o INR Datetime 1
- o INR Datetime 2
- o INR Datetime 3
- o INR Datetime Max
- Lactate Level Datetime 1
- Lactate Level Datetime 2
- Lactate Level Datetime 3
- Lactate Level Datetime Max
- Platelets Datetime 1
- Platelets Datetime 2
- Platelets Datetime 3
- Platelets Datetime Min
- Systolic First Datetime 1
- Systolic Second Datetime 2
- Systolic Third Datetime 3
- Systolic Datetime Min
- Several appendices were modified to remove decimal places within codes. Be sure to review Appendices D2.1 change log for the specific variables that were updated. The following appendices were modified:
 - Appendix 1Y: Smoking or Vaping Comorbidity / Risk Factor (POA) ICD-10 CM Codes
 - o Appendix 2D: Flu Positive Clinical ICD-10-CM Codes
- Appendix 2A: COVID-19 Exposure Clinical ICD-10-CM Codes was updated to include one additional code.
- Appendix 2E: Suspected Source of Infection was updated to include additional codes.
- Be sure to review Appendices D2.1 for the specific codes that were added.

Version D2.0

- Suspected Source of Infection value was changed for option 11 to read "soft tissue infection".
- The order of the appendices was changed to align with the order of the data elements in the data dictionary.
- Several appendices were updated to include additional codes. Be sure to review Appendices D2.0 for the specific codes that were added. The following appendices were modified:
 - Appendix 1E: Chronic Liver Disease Comorbidity / Risk Factor
 - o Appendix 1G: Chronic Respiratory Failure Comorbidity / Risk Factor
 - Appendix 1H: Coagulopathy Comorbidity / Risk Factor
 - o Appendix 1P: Immunocompromising Comorbidity / Risk Factor
 - Appendix 1S: Medication Anticoagulant

- o Appendix 1T: Medication Immune Modifying
- Appendix 1V: Obesity Comorbidity
- Appendix 2D: Flu Positive Clinical
- o Appendix 2E: Suspected Source of Infection
- o Appendix 3F: Vasopressor Administration Treatment Medication and NDC Codes
- Descriptions of CSV files of codes were added to *Key points to remember during data extraction*.
- "Collected" was added to the severity variables to specify that collected datetime should be reported for the labs and vital signs.
- Cardiac outcome was renamed to cardiovascular outcome.
- The notes for abstraction of *Race* were modified to provide a single link to SPARCS codes and values.
- The notes for abstraction of *Pregnancy Status During Hospitalization* were modified.
- The notes for abstraction of *Flu Positive* were modified.
- The notes for abstraction of *Tracheostomy in Hospital* were modified.
- The description of *Medication Immune Modifying* was modified.
- The description and codes and values of *Lactate Level Max* were modified.
- The notes for abstraction of all labs reported as Severity Variables have been modified. The following notes have been added for the labs and their respective collected date and time:
 - For all labs, if the initial lab collected was contaminated or determined questionable (e.g., did not result), report the result and the date and time of the subsequent lab collected.
 - For all labs, if the numeric value is preceded by "<" (less than) or ">" (greater than) signs, this sign should be reported. For example <0.1 should be reported as <0.1.
 For example >100,000 should be reported as >100,000.
